Intelligent Textiles and Clothing for Ballistic and NBC Protection Paul Kiekens,Sundaresan Jayaraman,2012-01-05 This volume describes the latest developments in protective clothing against nearly any kind of threat for both military and civilians It deals with protection through the use of nanotechnology interactive clothing and biotechnological processes Factors such as comfort and ballistics are also considered in the book and several practical examples are discussed All papers are written by leading experts in their respective fields Professionals and students alike will benefit from the knowledge and expertise imparted in these outstanding contributions **Preventing Chemical Weapons** Michael Crowley,Malcolm Dando,Lijun Shang,2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of

chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all **Working in Biosafety Level 3 and 4 Laboratories** Manfred Weidmann,Nigel Silmann,Patrick Butaye,Mandy Elschner,2013-09-18 The first training manual for new staff working in BSL3 4 labs This guide is based on a course developed in 2007 by the EU COST action group 28b which serves as a standard for many courses BSL3 4 training courses worldwide The four day course consists of lectures and practical training with the lecturers covering all the different possibilities of organising a BSL 3 4 lab including the adaptation to the local requirements of biosafety safety at work and social regulations This book covers bio containment hazard criteria and categorisation of microbes technical specifications of BSL 3 laboratories and ABSL 3 laboratories personal protective gear shipping BSL 3 and BSL 4 organisms according to UN and IATA regulations efficacy of inactivation procedures fumigation learning from a history of lab accidents handling samples that arrive for diagnostic testing and bridging the gap between the requirements of bio containment and diagnostics Course participants can not only use the book for their actual training event but it will remain a useful reference throughout their career in BSL3 4 labs

The Darkest Sides of Politics, II Jeffrey M. Bale,2017-10-04 This book examines a wide array of phenomena that arguably constitute the most noxious extreme terrifying murderous secretive authoritarian and or anti democratic aspects of national and international politics Scholars should not ignore these dark sides of politics however unpleasant they may be since they influence the world in a multitude of harmful ways The second volume in this two volume collection focuses primarily on assorted religious extremists including apocalyptic millenarian cults Islamists and jihadist terrorist networks as well as CBRN chemical biological radiological and nuclear terrorism and the supposedly new nexus between organized criminal and extremist groups employing terrorist operational techniques A range of global case studies are included most of which focus on the lesser known activities of certain religious extremist milieus This collection should prove to be essential reading for students and researchers interested in understanding seemingly arcane but nonetheless important dimensions of recent historical and contemporary politics BSL3 and BSL4 Agents Mandy Elschner,Sally Cutler,Manfred Weidmann,Patrick Butaye,2012-04-16 In one handy book this reference gathers all the necessary information on 14 of the most commonly used dangerous groups of pathogens in biosafety level 3 and 4 laboratories All the chapters are uniformly structured with a brief overview of the microbiology pathology epidemiology and detection methods for each group In addition a whole chapter is

devoted to the special biosafety requirements disinfection decontamination protocols accident literature and accident procedures as well as treatment options for all the organisms This chapter is clearly marked and easy to find when opening the book Essential literature for the increasing number of BSL3 or BSL4 labs worldwide and for medical facilities intervening in the case of an incident
