Encyclopedia of Exploration, 1800 to 1850 Raymond John Howgego, 2004 In 732 major articles Raymond Howgego's *Encyclopedia of Exploration 1800 to 1850* attempts to detail every significant traveller voyager or expedition that set out during the period Its indexes provide the names of over 3000 travellers and 1000 ships while the bibliographies cite more than 10 000 works of reference Extensive biographical information is included for the travellers themselves placing every expedition thoroughly in its historical context The text is fully cross referenced between articles whilst every article is supplemented by a comprehensive bibliography of both primary and secondary sources *Encyclopedia of Exploration to 1800* Raymond John Howgego, 2003 A comprehensive reference guide to the history and literature of exploration travel and colonization from the earliest times to the year 1800 The vast scope of the *Encyclopedia of Exploration* makes it a work unlike any other in its combination of historical biographical and bibliographical data It includes a catalogue of all known expeditions voyages and travels as well as biographical information on the travellers themselves which places them in their historical context The *Encyclopedia of Exploration to 1800* is a massive undertaking resulting in a work that extends to 1 2 million words in almost 1200 pages The 2327 major articles have generated index entries totalling more than 7500 names of persons or ships mentioned in the text Within the text itself there are about 4000 cross references between articles Altogether nearly 20 000 bibliographical citations accompany the articles A considerable quantity of information in this book is presented here for the first time in English *Guide to Reference in Genealogy and Biography* Mary K. Mannix, Fred Burchsted, 2015-01-14 Profiling more than 1400 print and electronic sources this book helps connect librarians and researchers to the most relevant sources of information in genealogy and biography **Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America** Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The *Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America* tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna

the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigori Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region Canadian Exploration Literature Germaine Warkentin, 2007 This anthology is an entry point into the beginnings of a literate response to the awe and wonder inspired by an unfolding geography *Mastering the Niger* David Lambert, 2013-11-15 In *Mastering the Niger* David Lambert recalls Scotsman James MacQueen 1778 1870 and his publication of *A New Map of Africa* in 1841 to show that Atlantic slavery as a practice of subjugation a source of wealth and a focus of political struggle was entangled with the production circulation and reception of geographical knowledge The British empire banned the slave trade in 1807 and abolished slavery itself in 1833 creating a need for a new British imperial economy Without ever setting foot on the continent MacQueen took on the task of solving the Niger problem that is to successfully map the course of the river and its tributaries and thus breathe life into his scheme for the exploration colonization and commercial exploitation of West Africa Lambert illustrates how MacQueen's geographical research began four decades before the publication of the *New Map* when he was managing a sugar estate on the West Indian colony of Grenada There MacQueen encountered slaves with firsthand knowledge of West Africa whose accounts would form the basis of his geographical claims Lambert examines the inspirations and foundations for MacQueen's geographical theory as well as its reception arguing that Atlantic slavery and ideas for alternatives to it helped produce geographical knowledge while geographical discourse informed the struggle over slavery **Empires of Print** Patrick Scott Belk, 2017-05-08 At the turn of the twentieth century the publishing industries in Britain and the United States underwent dramatic expansions and reorganization that brought about an increased traffic in books and periodicals around the world Focusing on adventure fiction published from 1899 to 1919 Patrick Scott Belk looks at authors such as Joseph Conrad H G Wells Conan Doyle and John Buchan to explore how writers of popular fiction engaged with foreign markets and readers through periodical publishing Belk argues that popular fiction particularly the adventure genre developed in ways that directly correlate with authors' experiences and shows that popular genres of the late nineteenth and early twentieth centuries emerged as one way of marketing their literary works to expanding audiences of readers worldwide Despite an over determined print space altered by the rise of new kinds of consumers and transformations of accepted habits of reading publishing and writing the changes in British and American publishing at the turn of the twentieth century inspired an exciting new period of literary invention and experimentation in the adventure genre and the greater part of that invention and experimentation was happening in the magazines **Arctic Labyrinth** Glyn Williams, Sophia Costley, 2010-03 The elusive dream of locating the Northwest Passage an ocean route over the top of North America that promised a shortcut to the fabulous wealth of Asia obsessed explorers for centuries Until recently these channels were hopelessly choked by

impassible ice Voyagers faced unimaginable horrors entire ships crushed mass starvation disabling frostbite even cannibalism in pursuit of a futile goal Glyn Williams charts the entire sweep of this extraordinary history from the tiny woefully equipped vessels of the first Tudor expeditions to the twentieth century ventures that finally opened the Passage

volume Beautifully illustrated with more than 150 images Western Art Western History tells the stories of key artists both famous and obscure whose provocative pictures document the people and places of the nineteenth century American West The artists depicted in these pages represent a variety of personalities and artistic styles According to Tyler each of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century an age of exploration surveying pleasure travel and scientific discovery In eloquent and engaging prose Tyler unveils a fascinating cast of characters including the little known German Russian artist Louis Choris who served as a draftsman on the second Russian circumnavigation of the globe the exacting and precise Swiss artist Karl Bodmer who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River and the young American Alfred Jacob Miller whose seemingly frivolous and romantic depictions of western mountain men and American Indians remained largely unknown until the mid twentieth century Other artists showcased in this volume are John James Audubon George Caleb Bingham Alfred E Mathews and finally Frederic Remington who famously sought to capture the last glimmers of the old frontier A common thread throughout Western Art Western History is the important role that technology especially the development of lithography played in the dissemination of images As the author emphasizes many works by western artists are valuable not only as illustrations but as scientific documents imbued with cultural meaning By placing works of western art within these broader contexts Tyler enhances our understanding of their history and significance

promoting and ambitious entrepreneur His maps were a hybrid of fantasy and delusion When he did make land he enslaved the populace he found encouraged genocide and polluted relations between peoples He ended his career in near lunacy But Columbus had one asset that made all the difference an inborn sense of the sea of wind and weather and of selecting the optimal course to get from A to B Laurence Bergreen's energetic and bracing book gives the whole Columbus and most importantly the whole of his career not just the highlight of 1492 Columbus undertook three more voyages between 1494 and 1504 each designed to demonstrate that he could sail to China within a matter of weeks and convert those he found there to Christianity By their conclusion Columbus was broken in body and spirit a hero undone by the tragic flaw of pride If the first voyage illustrates the rewards of exploration this book shows how the subsequent voyages illustrate the costs political moral and economic **Australian Book Review**, 2006 [A Walk across Africa](#) Roy Bridges, 2018-02-15 The Nile Expedition of 1860-1863 was one of the most important exploratory expeditions made in the nineteenth century The long debated question of the location of the source of the Nile was answered despite continuing arguments and the venture had important historical consequences Earlier accounts of the expedition have assumed James Augustus Grant to have been no more than the loyal second in command to John Hanning Speke the leader This new edition of Grant's 1864 book *A Walk across Africa* provides the opportunity to re-examine his role The original text has been fully annotated with explanatory notes and also supplemented by extracts from the very remarkable detailed day to day journal which Grant kept Even more unusually this edition includes reproductions of the whole visual record which he made consisting of 147 watercolours and sketches This was the first ever visual record of large parts of East Africa and the Upper Nile Valley region These documentary and illustrative materials have been drawn from the extensive collection of Grant's papers now in the care of the National Library of Scotland The Library has co-operated in the preparation of this volume to make possible its special features Grant emerges as a much more impressive and important figure than has previously been recognised He was a trained scientist and his narrative is a well organised perspective on the expedition and its activities His own growing understanding of Africa and of Africans becomes apparent and helps to explain his later activities The editor provides a context to the expedition and its results and this includes a new approach to the understanding of the Nile source problem by exposing the credulity of the way many previous commentators have used Ptolemy's information and also by suggesting that the problem should be approached in the light of geological and geomorphological as well as historical information The Introduction in addition discusses Grant's work in the light of the development of the academic understanding of the history of Africa and of European involvement in the region **Egyptomania** Ronald H.
