Human resource development HRD is a very large field of practice and a relatively young academic discipline Furthermore HRD is deeply concerned about the dynamic issues of individual and organizational change Such a profession is in need of a complete and thoughtful foundational text That is the purpose of this book The intention is that this foundation book will serve the needs of both practitioners and academics for the purpose of adding clarity to their professional journeys While we have a personal preference as to the purpose and primary means of doing HRD work the attempt has been to provide a fair review of the range of major views that exist in the profession This book is directed toward several audiences First it is designed for university courses in HRD We argue that every HRD academic program needs a course that teaches the foundations of the field Second HRD researchers will find the book thought provoking and useful as a guide to core research issues Third it is written for reflective practitioners who actively seek to lead the field as it grows and matures Finally almost every practitioner will find parts of the book that will add depth to their practice
