## **Enchantment Of Reason:**

**Enchantment of Reason** Pierre Schlag, 1998      The Enchantment Of Reason Pierre Schlag, 1998-07-22 The Enchantment of Reason is a lively critique of American legal thought and the American legal system's deification of reason. In an attempt to understand the current malaise of American law and the depressed condition of American intellectual life in general, Pierre Schlag diagnoses what he believes is an epidemic of pathological reliance on the principle of reason. Contending that legal thinkers continually fail to recognize the aesthetic and ethical prejudices of rationalism, Schlag creates a genealogy that shows how the call to reason has become a manipulative vehicle of power, faith, and prejudice. In examining the fierce resistance to questioning reason's primacy, this renowned critic and professor of American law demonstrates how those who use and study the law perpetuate their own methodological blind spots. Claiming that reason has been endowed with a virtually mystical power to organize social life, Schlag unravels the seemingly rational world of judicial opinions, statutes, doctrines, and legal principles. In the process, he paints a shocking and sure to be controversial picture of the chaos and indeed violence of the American legal tradition. This bold commentary on the irrationality of reason in American law and legal studies will interest not only legal scholars and philosophers but also serious thinkers across a broad disciplinary spectrum.

**Latour and the Passage of Law** McGee Kyle McGee, 2016-08-18 These 13 essays explore Bruno Latour's legal theory from a variety of disciplinary perspectives. They combine analytical tools drawn from Latour's actor network theory developed in *Science in Action*, *Reassembling the Social*, and *The Making of Law* with the philosophical anthropology of the *Moderns* in *An Inquiry into Modes of Existence* to blaze a new trail in legal epistemology.

Towards a New Catholic Church in Advanced Modernity Staf Helleman, Jozef Wissink, 2012 A new Catholic Church is emerging in the West, one that is very different from the Church before 1960. This book describes the new Church in the making, its new position in society, its new structuring and workings, and its new frame of mind. The book also looks in a prospective way at some basic issues the Church has to deal with, such as imagining the Church in advanced modernity, attracting both youth and adults, rebuilding local communities, refashioning liturgy, and rethinking pastoral guidance. The book is the result of an interdisciplinary endeavor by philosophers, sociologists, and theologians. Series: Tilburg Theological Studies / Tilburger Theologische Studien Vol 5.

**Classical Traditions in Modern Fantasy** Brett M. Rogers, Benjamin Eldon Stevens, 2017 *Classical Traditions in Modern Fantasy* presents fifteen all-new essays on how fantasy draws on ancient Greek and Roman mythology, philosophy, literature, history, art, and cult practice. Ranging from harpies to hobbits, from Cyclopes to Cthulhu, the comparative study of Classics and fantasy reveals deep similarities between ancient and modern ways of imagining the world.

**Beyond Legal Reasoning: a Critique of Pure Lawyering** Jeffrey Lipshaw, 2017-03-27 The concept of learning to think like a lawyer is one of the cornerstones of legal education in the United States and beyond. In this book, Jeffrey Lipshaw provides a critique of the traditional views of thinking like a lawyer or pure lawyering aimed at lawyers, law professors, and students who want to

understand lawyering beyond the traditional warrior metaphor Drawing on his extensive experience at the intersection of real world law and business issues Professor Lipshaw presents a sophisticated philosophical argument that the pure lawyering of traditional legal education is agnostic to either truth or moral value of outcomes He demonstrates pure lawyering's potential both for illusions of certainty and cynical instrumentalism and the consequences of both when lawyers are called on as dealmakers policymakers and counsellors This book offers an avenue for getting beyond or unlearning merely how to think like a lawyer It combines legal theory philosophy of knowledge and doctrine with an appreciation of real life judgment calls that multi disciplinary lawyers are called upon to make The book will be of great interest to scholars of legal education legal language and reasoning as well as professors who teach both doctrine and thinking and writing skills in the first year law school curriculum and for anyone who is interested in seeking a perspective on thinking like a lawyer beyond the litigation arena

Politics without Stories David Ricci, 2016-08-19 Liberal candidates scholars and activists mainly promote pragmatism rather than large and powerful narratives which may be called alpha stories for their commanding presence over time Alternatively conservative counterparts to such liberals tend to promote their policy preferences in alpha stories praising effective markets excellent traditions and limited government In this face off liberals represent a post

Enlightenment world where many modern people following Max Weber are disenchanted while many conservatives echoing Edmund Burke cherish stories borrowed from the past Politics without Stories describes this storytelling gap as an electoral disadvantage for liberals because their campaigning lacks and will continue to lack the inspiration and shared commitments that great long term stories can provide Therefore Ricci argues that for tactical purposes liberals should concede their post Enlightenment skepticism and rally around short term stories designed to frame in political campaigns immediate situations which they regard as intolerable These may help liberals win elections and influence the course of modern life

**The Enchantments of Technology** Lee Bailey,2010-10-01 In The Enchantments of Technology Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments embody not only reason but also desires

**Faith seeking understanding** Nico Vorster,Frederik van Niekerk,2023-03-01 How did it all begin How do we even start to engage the differences between creation narratives in the Christian Bible and modern scientific theory The authors of this book explore hermeneutic approaches and developments in biblical studies to set the scene for a religious approach This approach is open to the

possibility that a literalist approach to Scripture is in fact the most unjustifiable reading of the Bible This may profoundly affect how we view God the cosmos and even ourselves To be able to read the Bible from the perspective of an open present and future paves the way for suppressed uncertainties to be liberated This paves the way for humankind to freely question all things without being enslaved by imposed religious dogma This is not to say that religion has served its purpose but it is far from it With the rise of technological advancements come other social and anthropological problems not to mention the challenge we face on a global scale with climate change et cetera Just as we dare to peek over the edge of a future without religion the authors bring us back to the fundamental teachings of faith traditions Christianity in particular They remind us that the solutions to these challenges are to be found in us becoming better humans Becoming better humans brings us back into the arena of faith traditions When technology may lead to social disconnection and narcissism religion calls for love of self and neighbour Where greed inspired advancements threaten the future of our planet religion teaches us to be in relationship with our environment and to be custodians of it

**Magic's Reason** Graham M. Jones,2017-12-06 In Magic's Reason Graham M Jones tells the entwined stories of anthropology and entertainment magic The two pursuits are not as separate as they may seem at first As Jones shows they not only matured around the same time but they also shared mutually reinforcing stances toward modernity and rationality It is no historical accident for example that colonial ethnographers drew analogies between Western magicians and native ritual performers who in their view hoodwinked gullible people into believing their sleight of hand was divine Using French magicians engagements with North African ritual performers as a case study Jones shows how magic became enshrined in anthropological reasoning Acknowledging the residue of magic's colonial origins doesn't require us to dispense with it Rather through this radical reassessment of classic anthropological ideas Magic's Reason develops a new perspective on the promise and peril of cross cultural comparison

**Wild Profusion** Celia Lowe,2013-10-31 Wild Profusion tells the fascinating story of biodiversity conservation in Indonesia in the decade culminating in the great fires of 1997-98 a time when the country's environment became a point of concern for social and environmental activists scientists and the many fishermen and farmers nationwide who suffered from degraded environments and faced accusations that they were destroying nature Celia Lowe argues that biodiversity in 1990s Indonesia implied a particular convergence of nature nation science and identity that made Indonesians mapping of the concept distinct within transnational practices of nature conservation at the time Lowe recounts the efforts of Indonesian biologists to document the species of the Togean Islands to develop Togean people and to turn this archipelago off the coast of Sulawesi into a national park Indonesian scientists aspired to a conservation biology that was both internationally recognizable and politically effective in the Indonesian context Simultaneously Lowe describes the experiences of Togean Sama people who had their own understandings of nature and nation To place Sama and scientist into the same conceptual frame Lowe studies Sama

Hackney, 2007-03-28 A critique of the Law Economics movement this book draws connections between conceptions of science and efforts at legitimating American legal theory as an objective enterprise **Reasoning beyond Reason** Jeff Sellars, 2011-01-01 There is a seeming dichotomy in C S Lewis's writing On the one hand we see the writer of argumentative works and on the other hand we have the imaginative poet Lewis also found this dichotomy within himself When he was a rationalist and atheist he found that these two sides of him were pulling in different directions he believed that his rationalist side could not be reconciled with his imaginative side Once he became a Christian he eventually found a means of marrying the two principally through story and myth Within C S Lewis studies there is also a common conception of Lewis as a modern rationalist philosopher i e a rationalist who thinks arguments and his arguments in particular are the last answer on the questions he undertakes Reasoning beyond Reason attempts to take this view to task by placing Lewis back into his pre modern context and showing that his sources and influences are classical ones In this process Lewis is viewed through the idea that imagination and reason are connected in an intimate way they are different expressions of a single divine source of truth and there is an imagination already present upon which reason works Lewis's transpositional view of imagination implicitly pushes towards a somewhat radical position the imagination is to be seen as theological in its reliance upon something more than the merely material it necessarily relies on a transcendent funding for its use and meaning In other words the imagination is a well source for what we might normally label rational **Unsettling Jewish Knowledge** Anne C. Dailey, Martin Kavka, Lital Levy, 2023-09-08 Spanning the fields of literature history philosophy and theology Unsettling Jewish Knowledge adopts a fresh approach to the study of Jewish thought and culture By creatively foregrounding the role of emotions senses and the imagination in Jewish experience the book invites readers to consider what it means for Jewish identity and experience to be constituted outside the frameworks of reasoned thought and inquiry The collection's eight essays offer innovative and provocative approaches to a diverse array of topics including modern Jewish Christian relations the book of Isaiah contemporary Jewish fiction and philosophical meditations on Jewish law Their bold interpretations of Jewish texts and histories are centered on questions of faith loss prejudice and enchantment and the darker implications of these questions The book's essays also illuminate the importance of desire as a key motivating force in the pursuit of knowledge Weaving together insights from several disciplines Unsettling Jewish Knowledge challenges us to grapple with the unexpected the unconventional and the uncomfortable aspects of Jewish experience and its representations Contributors Anne C Dailey John Efron Yael S Feldman Galit Hasan Rokem Martin Kavka Lital Levy Shaul Magid Eva Mroczek Paul E Nahme Eli Schonfeld Shira Stav *Latter-Day Saint Perspectives on Law Conference*, 2003
