Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction

has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

Rescuing Women from American Mythology Michael A. Solis, 2021-03-17 This book explores American mythology through the lens of comic books and superheroes specifically exploring the subject from an historical perspective in order to capture the origins of sexism and misogyny as found in the comic book stories that have shaped so many young people and their attitudes It provides a detailed analysis of America's inextricable relationship with sexist institutions specific historical events and cultural attitudes all of which are captured by and perpetuated in comic books TV film and advertising The implicit argument this book makes is that sexism and misogyny are not the product of nefarious individuals with overt agendas instead sexism and misogyny are products of our mythology and the associated archetypal components that shape a fabricated design of the world a design shaped by men and unwittingly agreed to by women thus perpetuating a male dominated mythological religious and historical social structure
