**The Books of Samuel, Volume 2** Cyril J. Barber, 2003-10-07 Cyril Barber is convinced that the books of Samuel were written not to display the horror of David's sins of murder and adultery but rather to demonstrate God's faithfulness in raising up prophets, priests and kings to move history toward the coming of Christ. The central focus of this commentary is to show that the sovereign God weaves His own historical patterns alongside human failure and sin. Some people will read this volume for the exegetical light it sheds on 2 Samuel. Others will seek personal applications and find help in the great lessons that can be learned from the mistakes and successes of the past. All who read it will derive a new appreciation for the work of God in human history. I should warn you that this commentary challenges familiar interpretations and looks at the events of 2 Samuel through a different set of glasses. But precisely for this reason I wish it a wide distribution. From the Foreword by Erwin W. Lutzer

**Ancient Synagogues, Volume 2** Risto Ilmari Uro, Paul V.M. Flesher, 2022-11-07 The origins of the synagogue remain shrouded in mystery and its development in its early centuries is only slightly better understood. This book brings together over twenty essays from Israeli, British and American scholars to explore the development of the ancient synagogue. Combining original articles with the best of earlier studies including nine articles here translated from the Hebrew for the first time, this collection presents the fullest critical picture of the early synagogue and the scholarly discussions concerning it. The book focuses on two central questions: First, what were the origins of the earliest synagogues and where did they achieve the greatest growth in the early centuries? Second, what role did the early synagogue play within the Jewish community? The print edition is available as a set of two volumes. 9789004112544

Connotations Pierre J. Jordaan, Nicholas P. L. Temples and Sanctuaries in the Roman East Arthur Segal, 2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion
