*Science in the Context of Application* Martin Carrier, Alfred Nordmann, 2010-11-12 We increasingly view the world around us as a product of science and technology Accordingly we have begun to appreciate that science does not take its problems only from nature and then produces technological applications but that the very problems of scientific research themselves are generated by science and technology Simultaneously problems like global warming the toxicology of nanoparticles or the use of renewable energies are constituted by many factors that interact with great complexity Science in the context of application is challenged to gain new understanding and control of such complexity it cannot seek shelter in the ivory tower or simply pursue its internal quest for understanding and gradual improvement of grand theories Science in the Context of Application will identify explore and assess these changes Part I considers the Changing Conditions of Scientific Research and part II Science Values and Society Examples are drawn from pharmaceutical research the information sciences simulation modelling nanotechnology cancer research the effects of commercialization and many other fields The book assembles papers from well known European and American Science Studies scholars like Bernadette Bensaude Vincent Janet Kourany Michael Mahoney Margaret Morrison Hans J rg Rheinberger Arie Rip Dan Sarewitz Peter Weingart and others The individual chapters are written to address anyone who is concerned about the role of contemporary science in society including scientists philosophers and policy makers
