Klassen, 2021-06-08 *Blessed Events* explores how women who give birth at home use religion to make sense of their births and in turn draw on their birthing experiences to bring meaning to their lives and families Pamela Klassen introduces a surprisingly diverse group of women in their own words while also setting their birth stories within wider social political and economic contexts In doing so she emerges with a study that disrupts conventional views of both childbirth and religion by blurring assumed divisions between conservative and feminist women and by taking childbirth seriously as a religious act Most American women who have a choice give birth in a hospital and request pain medication Yet enough women choose and advocate unmedicated home birth and do so for carefully articulated reasons social resistance among them to constitute a movement Klassen investigates why women whose religious affiliations range from Old Order Amish to Reform Judaism to

goddess centered spirituality defy majority opinion the medical establishment and sometimes the law to have their babies at home In considering their interpretations including their critiques of the dominant medical model of childbirth and their views on labor pain she examines the kinds of agency afforded to or denied women as they derive religious meanings from childbirth Throughout she identifies tensions and affinities between feminist and traditionalist appraisals of the symbolic meaning of birth and the power of women What does home birth a woman centered movement working to return birth to women s control mean in practice for women s gender and religious identities Is this supreme valuing of procreation and motherhood constraining or does it open up new realms of cultural and social power for women By asking these questions while remaining cognizant of religion s significance *Blessed Events* challenges both feminist and traditionalist accounts of childbearing while broadening our understanding of how religion is lived in contemporary America

Walker, 2017-07-05 An original and valuable intervention in the fast growing field of feminist and new art histories Nancy Spero *Encounters* offers a sophisticated interpretation of the work of a highly original and under represented woman artist The study proposes a new model of comparatism within the field of visual studies mirroring and complementing Spero s dialogic manner of working Basing her analyses on extensive research and multiple face to face interviews with the artist Joanna Walker examines how a selection of the artists and art forms Spero cited offer significant

Prospects and Impediments of Feminist

Monolithism Rosalyn Mutia, 2021-02-01 This book reads mid twentieth century poetry by British American and Sub Saharan women to postulate the desirability and possibility of feminist monolithism It shows that there is a remarkable consistency in the themes and aesthetic preoccupations of poets widely separated from each other by both geographical space and historical epochs which highlights that there are pertinent cross cutting trends in women's poetry which could be exploited as a basis for monolithism The text identifies the main tenets of feminism as recognition of women's oppression and a determined effort through concerted strategies to resist and thwart this oppression and to navigate women out of peripheral positions into positions of power By showing that these tenets are uniformly present in the poetry of very different women it posits this uniformity as a stable ground on which feminist monolithism could be constructed without glossing over existent differences between and among women

Women in Eighteenth Century Europe Margaret Hunt, 2014-06-11 Was the century of Voltaire also the century of women In the eighteenth century changes in the nature of work family life sexuality education law religion politics and warfare radically altered the lives of women Some of these developments caused immense

confusion and suffering others greatly expanded women's opportunities and worldview long before the various women's suffrage movements were more than a glimmer on the horizon. This study pays attention to queens as well as commoners, respectable working women as well as prostitutes, women physicists and mathematicians as well as musicians and actresses, feminists as well as their critics. The result is a rich and morally complex tale of conflict and tragedy but also of achievement. The book deals with many regions and topics often underrepresented in general surveys of European women, including coverage of the Balkans and both European Turkey and Anatolia, of Eastern Europe, of European colonial expansion, particularly the slave trade, and of Muslim, Eastern Orthodox, and Jewish women's history. Bringing all of Europe into the narrative of early modern women's history challenges many received assumptions about Europe and women in past times and provides essential background for dealing with issues of diversity in the Europe of today.
