

Adding and Subtracting Fractions

$$\frac{1}{9} + \frac{2}{3} = \frac{7}{9}$$

Use equivalent fractions to create a common denominator of 9.

Multiply the numerator and denominator of $\frac{2}{3}$ by 3:

$$\frac{2 \times 3}{3 \times 3} = \frac{6}{9}$$

Then add $\frac{1}{9} + \frac{6}{9} = \frac{7}{9}$

Multiplying Fractions

$$\frac{1}{4} \times \frac{1}{3}$$

In the model, $\frac{1}{3}$ is yellow and $\frac{1}{4}$ is blue.

The product is where the fractions overlap in green.

Using the algorithm, multiply the numerators together, and multiply the denominators together:

$$\frac{1}{4} \times \frac{1}{3} = \frac{1}{12}$$

Dividing Fractions

$$3 \div \frac{1}{3}$$

The quotient is the number of groups of $\frac{1}{3}$ created by dividing.

Using the algorithm,

keep the dividend: $3 = \frac{3}{1}$

Take the reciprocal of the divisor: $\frac{1}{3} \rightarrow \frac{3}{1}$

Change to multiplication: $\frac{3}{1} \times \frac{3}{1}$

Multiply the fractions: $\frac{3}{1} \times \frac{3}{1} = \frac{9}{1}$

So, $3 \div \frac{1}{3} = 9$

Understanding Numbers in Elementary School Mathematics Hongxi Wu, 2011. This is a textbook for pre-service elementary school teachers and for current teachers who are taking professional development courses. By emphasizing the precision of mathematics, the exposition achieves a logical and coherent account of school mathematics at the appropriate level for the readership. Wu provides a comprehensive treatment of all the standard topics about numbers in the school mathematics curriculum: whole numbers, fractions, and rational numbers. Assuming no previous knowledge of mathematics, the presentation develops the basic facts about numbers from the beginning and thoroughly covers the subject matter for grades K through 7. Every single assertion is established in the context of elementary school mathematics in a manner that is completely consistent with the basic requirements of mathematics. While it is a textbook for pre-service elementary teachers, it is also a reference book that school teachers can refer to for explanations of well-known but hitherto unexplained facts. For example, the sometimes puzzling concepts of percent, ratio, and rate are each given a treatment that is down to earth and devoid of mysticism. The fact that a negative times a negative is a positive is explained in a leisurely and comprehensible fashion.

Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based

strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research **Praxis**
