Design of the National Children's Study Institute of Medicine,National Research Council,Board on Children, Youth, and Families,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,2013-08-27 The Children s Health Act mandated the National Children s Study NCS in 2000 with one of its purposes being to authorize the National Institute of Child Health and Human Development NICHD to study the environmental influences including physical chemical biological and psychosocial on children s health and development The NCS examines all aspects of the environment including air water diet noise family dynamics and genetics on the growth development and health of children across the United States for a period of 21 years The purpose of NCS is to improve the health and well being of children and to contribute to understanding the role of these factors on health and disease The research plan for the NCS was developed from 2005 to 2007 in collaboration among the Interagency Coordinating Committee the NCS Advisory Committee the NCS Program Office Westat the Vanguard Center principal investigators and federal scientists The current design of the study however uses a separate pilot to assess quality of scientific output logistics and operations and a Main Study to examine exposure outcome relationships The NCS proposed the use of a multilayered cohort approach for the Main Study which was one of the topics for discussion at the workshop that is the subject of this publication In the fall of 2012 NICHD requested that the Committee on National Statistics CNSTAT of the NRC and the IOM convene a joint workshop to be led by CNSTAT The workshop was to focus on issues related to the overall design including the framework for implementation of the NCS The committee was provided a background paper which it used to select the challenges that were discussed at the workshop Design of the National Children s Study A Workshop Summary presents an overview of the workshop held on January 11 2013 The publication includes summaries of the four sessions of the workshop a list of participants and the agenda *The Doctor-Patient Relationship and the Nineteenth-Century French Novel* Sarah Jones,2025-03-29 The Doctor Patient Relationship and the Nineteenth Century French Novel analyses the representation of the doctor patient relationship in the nineteenth century French novel notably in the words of Balzac Sand Stendhal and Zola It argues that the doctor patient relationship is represented in these novels as a site of interpersonal negotiation wherein the meaning of medical authority embodied experience and the spectre of illness and pain are mediated and reimagined This book highlights how the doctor patient relationship is often idealized by the novel wherein the doctor is characterised as a both dedicated to his patients and local community as well as being a God like master of life death and medical knowledge The volume suggests that the doctor patient encounter is often depicted as a separate although inherently related concept that undermines this idealisation of

medical relationships The doctor patient encounter thereby questions the hegemonic power of medical practitioners over their patients by pointing towards how novels depict patients as resisting and even manipulating their doctors The book identifies and explores other important themes within the doctor patient relationship such as the medical gaze regard m dical power relationships and the use of embodied metaphor In particular the book highlights how the doctor patient relationship is often a confrontation between scientific knowledge and the experience of gender and disability The book s conceptual framework is derived from the critical medical humanities and the volume revitalises and reframes the doctor patient relationship by considering the intrinsic slippage between idealised relationships and critical encounters The book uses close readings of its corpus to understand how medical practice is debated and undermined concurrently with its idealisation It places literary works within a new historical context by reading across novels within their medical and scientific context and situates them for the first time in the intellectual context of the critical medical humanities The book points forward to how nineteenth century French novels can reform how the critical medical humanities views the medical relationship and the potential impact on real world patients *Saunders Medical Office Management* Alice Anne Andress,2013-08-09
