Artificial Intelligence-Enabled Blockchain Technology and Digital Twin for Smart Hospitals
Amit Kumar Tyagi, 2024-10-15 The book uniquely explores the fundamentals of blockchain and digital twin and their uses in smart hospitals Artificial Intelligence Enabled Blockchain Technology and Digital Twin for Smart Hospitals provides fundamental information on blockchain and digital twin technology as effective solutions in smart hospitals Digital twin technology enables the creation of real time virtual replicas of hospital assets and patients enhancing predictive maintenance operational efficiency and patient care Blockchain technology provides a secure and transparent platform for managing and sharing sensitive data such as medical records and pharmaceutical supply chains By combining these technologies smart hospitals can ensure data security interoperability and streamlined operations while providing patient centered care The book also explores the impact of collected medical data from real time systems in smart hospitals and by making it accessible to all doctors via a smartphone or mobile device for fast decisions Inevitable challenges such as privacy concerns and integration costs must of course be addressed However the potential benefits in terms of improved healthcare quality reduced costs and global health initiatives makes the integration of these technologies a compelling avenue for the future of healthcare Some of the topics that readers will find in this book include Wireless Medical Sensor Networks in Smart Hospitals DNA Computing in Cryptography Enhancing Diabetic Retinopathy and Glaucoma Diagnosis through Efficient Retinal Vessel Segmentation and Disease Classification Machine Learning Enabled Digital Twins for Diagnostic And Therapeutic Purposes Blockchain as the Backbone of a Connected Ecosystem of Smart Hospitals Blockchain for Edge Association in Digital Twin Empowered 6G Networks Blockchain for Security and Privacy in Smart Healthcare Blockchain Enabled Internet of Things IoTs Platforms for IoT Based Healthcare and Biomedical Sector Electronic Health Records in a Blockchain PSO Based Hybrid Cardiovascular Disease Prediction for Using Artificial Flora Algorithm AI and Transfer Learning Based Framework for Efficient Classification And Detection Of Lyme Disease Framework for Gender Detection Using Facial Countenances Smartphone Based Sensors for Biomedical Applications Blockchain for Improving Security and Privacy in the Smart Sensor Network Sensors and Digital Twin Application in Healthcare Facilities Management Integration of Internet of Medical Things IoMT with Blockchain Technology to Improve Security and Privacy Machine Learning Driven Digital Twins for Precise Brain Tumor and Breast Cancer Assessment Ethical and Technological Convergence AI and Blockchain in Halal Healthcare Digital Twin Application in Healthcare Facilities Management Cloud based Digital Twinning for Structural Health Monitoring Using Deep Learning Audience The book will be read by hospital and healthcare providers administrators policymakers scientists and engineers in artificial intelligence information technology electronics engineering

and related disciplines Blockchain and Digital Twin for Smart Hospitals Tuan Anh Nguyen, 2025-02-01 Blockchain and Digital Twins for Smart Healthcare describes the role of blockchain and digital twins in smart healthcare covering the ecosystem of the Internet of Medical Things how data can be gathered using a sensor network which is securely stored updated and managed with blockchain for efficient and private medical data exchange Medical data is collected real time from devices and systems in smart hospitals the internet of medical things This data is integrated to provide insight from the analytics or machine learning software using digital twins Security and transparency are brought through a combination of digital twin and blockchain technologies Provides the fundamentals of blockchain digital twins and IoMT Presents a useful guide for readers on the new applications of blockchain the medical digital twin and IoMT Explores how blockchain and digital twins can be used in the IoMT smart hospitals and for future healthcare services **Sensor Networks for Smart Hospitals**

Tuan Anh Nguyen, 2025-01-23 Sensor Networks for Smart Hospitals shows how the use of sensors to gather data on a patient's condition and the environment in which their care takes place can allow healthcare professionals to monitor well being and make informed decisions about treatment Written by experts in the field this book is an invaluable resource for researchers and healthcare practitioners in their drive to use technology to improve the lives of patients Data from sensor networks via the smart hospital framework is comprised of three main layers data insights and access Medical data is collected in real time from an array of intelligent devices systems deployed within the hospital This data offers insight from the analytics or machine learning software that is accessible to healthcare staff via a smartphone or mobile device to facilitate swifter decisions and greater efficiency Describes the fundamentals of sensors biosensors and smart hospitals Explains how sensors and implanted nanodevices can be used in smart healthcare Discusses how intelligent wireless medical sensor networks can be used for healthcare in the future Companion volume to Advanced Sensors for Smart Healthcare

Smart Hospitals Arun Kumar, Manoj Gupta, Sanjeev Sharma, Er. Himanshu Sharma, Khursheed Aurangzeb, 2024-12-05 Discover the potential of 5G 6G and smart hospitals beyond connectivity in Smart Hospitals 5G 6G and Moving Beyond Connectivity and learn how these advancements are revolutionizing healthcare and the digital world The advancement of wireless communication technologies has revolutionized the way we connect and interact with the digital world The introduction of 5G networks has paved the way for faster more reliable and low latency wireless connections However as technology continues to evolve the focus is now shifting toward exploring the future potential of 5G and 6G and their applications in various industries One such industry that stands to benefit significantly from these advancements is healthcare particularly with the concept of smart hospitals The development of smart hospitals relies on IT infrastructure software solutions and data management systems IT professionals and software developers work with healthcare professionals on designing and implementing systems that enable seamless connectivity data integration analytics and security in smart hospital environments Smart Hospitals 5G 6G and Moving Beyond Connectivity delves into the potential of

5G 6G and smart hospitals highlighting how they go beyond mere connectivity

5G-Based Smart Hospitals and Healthcare Systems Arun Kumar, Sumit Chakravarty, Aravinda K, Mohit Kumar Sharma, 2023-12-13 With the increase in the development of the advanced cellular communication system it is assumed that several sectors such as the health industry education transport industry business model and so on will rapidly grow However the requirements of the above mentioned sectors are different and difficult to fulfill Hence 5G will be integral to several networks and will also need a unique management system for its successful rollout around the globe 5G Based Smart Hospitals and Healthcare Systems Evaluation Integration and Deployment provides an overview of the role of advanced technologies in transforming the healthcare industry It emphasizes the technical requirements of smart hospitals and the technologies associated with them along with explaining how technologies such as IoT machine learning and AI can be integrated with smart hospitals and 5G networks The book evaluates several concerns such as privacy of data infrastructure costs and regular upgradability of technologies Since the storage of information is a major concern with the implantation of 5G based hospitals this book will specifically address those issues along with examining the potential pitfalls of 5G based hospitals and the factors that cause their failures This book specifically targets professionals academicians engineers researchers management firms technical institutes R D establishments and individuals researching in the fields of 5G healthcare medical sensors IoT big data and related fields The main objectives of this book are to accumulate state of the art IoT 5G AI and machine learning based approaches for resolving healthcare problems

Indoor Air Quality Assessment for Smart Environments J. Saini, M. Dutta, G. Marques, 2022-05-18 Indoor air quality IAQ and indoor air pollution IAP are a matter of concern in many countries because they can significantly influence the general health and well being of those who spend most of their time inside whether at home or work Poor IAQ and repeated exposure to dangerous concentrations of pollutants can contribute significantly to the healthcare burden along with increased absenteeism and lost productivity worldwide This book Indoor Air Quality Assessment for Smart Environments explores the problem of IAQ and highlights potential challenges gaps and opportunities in the field As the title suggests it focuses on assessing IAQ in smart environments using emerging technologies such as the Internet of Things IoT and Wireless Sensor Networks WSN that can further contribute to the development of intelligent building management systems The book contains 8 chapters written by various experts in the field and addressing significant elements of IAQ management including definition state of the art and applications sensing techniques technological interventions and smart environments smart monitoring devices green and smart hospitals health risks of nano building products the optimization of household ventilation and an assessment of smart environments While providing a useful source of knowledge for researchers policymakers public health professionals and government agencies wishing to enhance the air quality in buildings the book will also serve as a

guide to building occupants who wish to take the necessary measures to enhance the built environment with improved ventilation arrangements *Smart Systems and IoT: Innovations in Computing* Arun K. Somani, Rajveer Singh Shekhawat, Ankit Mundra, Sumit Srivastava, Vivek Kumar Verma, 2019-10-26 The book features original papers from the 2nd International Conference on Smart IoT Systems Innovations and Computing SSIC 2019 presenting scientific work related to smart solution concepts It discusses computational collective intelligence which includes interactions between smart devices smart environments and smart interactions as well as information technology support for such areas It also describes how to successfully approach various government organizations for funding for business and the humanitarian technology development projects Thanks to the high quality content and the broad range of the topics covered the book appeals to researchers pursuing advanced studies Foundations of Artificial Intelligence in Healthcare and Bioscience Louis J. Catania, 2020-11-25 Foundational Handbook of Artificial Intelligence in Healthcare and Bioscience A User Friendly Guide for IT Professionals Healthcare Providers Researchers and Clinicians uses color coded illustrations to explain AI from its basics to modern technologies Other sections cover extensive current literature research and citations regarding AI s role in the business and clinical aspects of health care The book provides readers with a unique opportunity to appreciate AI technology in practical terms understand its applications and realize its profound influence on the clinical and business aspects of health care Artificial Intelligence is a disruptive technology that is having a profound and growing influence on the business of health care as well as medical diagnosis treatment research and clinical delivery The AI relationships in health care are complex but understandable especially when discussed and developed from their foundational elements through to their practical applications in health care Provides an illustrated foundational guide and comprehensive descriptions of what Artificial Intelligence is and how it functions Integrates a comprehensive discussion of AI applications in the business of health care Presents in depth clinical and AI related discussions on diagnostic medicine therapeutic medicine and prevalent disease categories with an emphasis on immunology and genetics the two categories most influenced by AI Includes comprehensive coverage of a variety of AI treatment applications including medical pharmaceutical care nursing care stem cell therapies robotics and 10 common disease categories with AI applications *IoT-WSN-DT Based Medical Systems and Nanotechnology for Smart Cancer Care* Tuan Anh Nguyen, 2025-08-01 IoT WSN DT Based Medical Systems and Nanotechnology for Smart Cancer Care explores the latest advances in nanotechnology artificial intelligence Internet of Medical Things IoMT digital twin and wireless sensor networks for real time cancer care enabling efficient decision making and treatment The book examines how data from medical nanosensors can be integrated with the technology of digital twins for cancer forecasting and monitoring providing accessible smart insights via remote and mobile devices By combining the strengths of smart nanotechnology IoT based platforms WSN technologies and DT a powerful medical system can be developed for smart cancer care This system can help in early diagnosis targeted drug delivery real time monitoring and

personalized treatment ultimately improving patient outcomes Covers how nanosensors and nanodevices can be used in cancer forecasting detection and monitoring Explores how nanomedicines and nanovaccines can be used in cancer treatment and diagnosis Explains how digital twin AI and nanotechnology can be used for the future of cancer diagnostics and treatment

Smart Economy in Smart Cities T. M. Vinod Kumar, 2016-08-25 The present book highlights studies that show how smart cities promote urban economic development The book surveys the state of the art of Smart City Economic Development through a literature survey The book uses 13 in depth city research case studies in 10 countries such as the North America Europe Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa This book focuses on exploratory city studies in different countries which investigate how urban spatial systems adapt to the specific needs of smart urban economy The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy which in turn changes the land use system It points out that the dynamics of smart city GDP creation takes different paths which need further empirical study hypothesis testing and mathematical modelling Although there are hypotheses on how smart cities generate wealth and social benefits for nations there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation This book with 13 cities research studies is one attempt to fill in the gap in knowledge base

Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine, Volume IV Zhongheng Zhang, Rahul Kashyap, Longxiang Su, Nan Liu, Qinghe Meng, 2024-01-23 This Research Topic is the fourth volume of the series Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Volume II Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume II Volume III Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume III Analytics based on artificial intelligence has greatly advanced scientific research fields like natural language processing and imaging classification Clinical research has also greatly benefited from artificial intelligence Emergency and critical care physicians face patients with rapidly changing conditions which require accurate risk stratification and initiation of rescue therapy Furthermore critically ill patients such as those with sepsis acute respiratory distress syndrome and trauma are comprised of heterogeneous population The one size fit all paradigm may not fit for the management of such heterogeneous patient population Thus artificial intelligence can be employed to identify novel subphenotypes of these patients These sub classifications can provide not only prognostic value for risk stratification but also predictive value for individualized treatment With the development of transcriptome providing a large amount of information for an individual artificial intelligence can greatly help to identify useful information from high dimensional data Altogether it is of great importance to further utilize artificial intelligence in the management of critically ill patients
