the evolution of performance tuning through the lens of the 34 billion speed equipment industry that supports it As early as 1910 dozens of small shops across the United States designed manufactured and sold add on parts to consumers eager to employ new technologies as they tinkered with their cars Operating for much of the twentieth century in the shadow of the Big Three automobile manufacturers General Motors Ford and Chrysler these businesses grew at an impressive rate supplying young and old hot rodders with thousands of performance boosting gadgets Lucsko offers a rich and heretofore untold account of the culture and technology of the high performance automotive aftermarket in the United States offering a fresh perspective on the history of the automobile in America *Vintage Speed Parts* Tony Thacker,2022-10-10 Follow the history of hot rodding through this nostalgic look at vintage speed equipment When most people think of speed parts they rewind a few decades and think back to the Ford flatheads that were so prevalent in the 1940s and 1950s However did you know that the speed parts industry began way back in the Model T era It s true As soon as vehicles were mass produced manufacturers were looking for ways to make them faster Manufacturers such as Roof Rajo Winfield Miller Frontenac and Holley made speed parts for 4 cylinder Model T engines and accomplished speeds of up to 100 mph In *Vintage Speed Parts The Equipment That Fueled the Industry* veteran hot rod historian Tony Thacker looks at the history of hot rodding through the eyes of speed equipment manufacturers Covered chronologically the book begins with the early 4 cylinder engines In 1932 Henry Ford introduced the flathead V 8 which was slow to be adopted as the engine of choice in racing until the parts industry caught up Once it did the flathead although interrupted by the war was the engine to run until the automobile manufacturers introduced overhead valve V 8 engines in the late 1940s Chrysler s early 1950s Hemi and Chevrolet s small block V 8 in 1955 spelled the end for the flattie Both mills dominated well into the 1970s and the speed industry was there to support all platforms in spades During that period every auto manufacturer made a V 8 worthy of modification and the speed industry boomed Eventually the speed equipment manufacturers grew to the point of becoming corporate entities as mergers and acquisitions became the much less interesting story Parts covered include special cylinder heads magnetos camshaft and valvetrain upgrades downdraft carburetors headers multiple carburetor setups and even superchargers Everyone figured out how to make engines more powerful upgrading with the type of parts that were being produced decades later even to today Join in the fun of reviewing the history of speed through this fascinating tale of vintage speed parts **Junkyards, Gearheads, and Rust** David N.
