Ball,2002-12-17 We know heat so well that we hardly ever think about it Yet all living things need heat to survive Heat is everywhere and it affects everything including where and how we live But what is heat really In Heat Discovery Channel tells you everything about heat that you have been burning to know Book jacket Atlas of North America Karen Foster, 2008 Explore North America Take a look at the continent's countries people cities plants animals farming and industry **Arcticness** Ilan Kelman, 2017-08-14 Climate change and globalisation are opening up transportation and leisure activities the Arctic for exploitation by the world or so we are told But what about the views interests and needs of the peoples who live in the region This volume explores the opportunities and limitations in engaging with the Arctic under change and the Arctic peoples experiencing the changes socially and physically With essays by both academics and Arctic peoples integrating multiple perspectives and multiple disciplines the book covers social legal political geographical scientific and creative

questions related to Arcticness to address the challenges faced by the Arctic as a region and specifically by local communities As well as academic essays the contributions to the book include personal reflections a graphic Topics covered in the essays include indigenous identity and livelihoods such as reindeer herding and adapting to modern identities a graphic essay on the experience of Arctic indigenous peoples in residential schools the effects of climate change energy in the Arctic and extractive industries and their impacts on local communities essay and poetry to ensure wide and varied coverage of the Arctic experience what the contributions all have in common is the fundamental human perspective The book includes reflections on the future of Arcticness engaging with communities to ensure meaningful representation and as a counterpoint to the primacy of environmental national and global issues The Politics of Arctic Resources E. Carina H. Keskitalo, 2019-04-10 The Arctic has often been seen as a natural area or even a wilderness where mainly indigenous and subsistence activities have been prominent Contrary to this the present volume highlights the very long historical development of resource use systems in northern Europe across multiple actors and multiple levels and including varying population groups The book takes a past present future perspective that illustrates the paths to institutional emergence change or persistence over time It also illustrates how institutions may themselves drive changes through a focus on resource use cases in northern Europe This volume demonstrates that understanding northern issues is less about understanding sets of geophysical climatological or environmental conditions than about understanding social and institutional structures Understanding these trajectories into the future is seen as a key way of understanding what responses to future change may be likely and what the institutions are that will shape limit or enable our responses to climate change This book will be of great use to scholars and graduates in the fields of Arctic and northern region politics and to researchers of resource use and climate change with a focus on vulnerability social vulnerability adaptation and mitigation Harvard Alumni Bulletin ,1922 Geological Survey Professional Paper Geological Survey (U.S.),1949

Geological Survey Research, 1971, Chapter A. Geological Survey (U.S.),1971 Alaska Claus M. Naske, Herman E. Slotnick,2014-10-22 The largest by far of the fifty states Alaska is also the state of greatest mystery and diversity And as Claus M Naske and Herman E Slotnick show in this comprehensive survey the history of Alaska's peoples and the development of its economy have matched the diversity of its land and seascapes Alaska A History begins by examining the region's geography and the Native peoples who inhabited it for thousands of years before the first Europeans arrived The Russians claimed northern North America by right of discovery in 1741 During their occupation of Russian America the region was little more than an outpost for fur hunters and traders When the czar sold the territory to the United States in 1867 nobody knew what to do with Seward's Folly Mainland America paid little attention to the new acquisition until a rush of gold seekers flooded into the Yukon Territory In 1906 Congress granted Alaska Territory a voteless delegate and in 1912 gave it a territorial legislature Not until 1959 however was Alaska's long sought goal of statehood realized During World War

II Alaska s place along the great circle route from the United States to Asia firmly established its military importance which was underscored during the Cold War The developing military garrison brought federal money and many new residents Then the discovery of huge oil and natural gas deposits gave a measure of economic security to the state Alaska A History provides a full chronological survey of the region s and state s history including the precedent setting Alaska Native Claims Settlement Act of 1971 which compensated Native Americans for their losses the effect of the oil industry and the trans Alaska pipeline on the economy the Exxon Valdez oil spill and Alaska politics through the early 2000s

the edges when the world is on fire Why is society unable to grasp the enormity of climate change In Beyond Climate Breakdown Peter Friederici writes that the answer must come in the form of a story and that our miscomprehension of the climate crisis comes about because we have been telling the wrong stories These stories are pervasive they come from long narrative traditions sanctioned by capitalism Hollywood and social media and they revolve around a myth that the nation exists primarily as a setting for a certain kind of economic activity Stories are how we make sense of the world and our place in it The story that the economy takes priority over everything else may seem foreordained but Friederici explains actually reflect choices made by specific people out of self interest So we need new stories stories that center the persistence of life rather than of capitalism stories that embrace contradiction and complexity We can create new stories based on comedy and radical hope Comedy never says no hope sprouts like a flower in cracked concrete These attitudes require a new way of thinking an adaptive attitude toward life that slips the narrow yoke of definition The American Restaurant, 1927
