**Caliban** Robert Silverberg, 2023-08-22 The Hugo and Nebula Award winning author delivers a prescient tale that explores the inanity of conformity with a hopelessly superficial future humankind Publishers Weekly starred review He was revived somehow and thrust into a brand new world one in which humans have evolved to breathe underwater reproduction is quite uncommon and everyone has standardized their appearance to conform to the presently favored model He is a rarity a throwback with his short legs hairy body lopsided face and scars He remembers automobiles tax returns a family all the components of an imperfect world But here and now he is an object of fascination to be studied by doctors and politicians and to be wanted by adventurous women He keeps telling himself that in a country of the beautiful the ugly man is king If only he'd listen Praise for Robert Silverberg and his short stories When

futuristic crime story from the Hugo and Nebula Award winning author of Lord Valentine's Castle. A lot of women were wearing Marianne's face that season which made it hard for Loren Frazier to forget that he killed his world famous wife's lover. The world wouldn't forget it either; the image of his murderous impulse was caught forever in his victim's brain as an eyeflash picture readily recovered by law enforcement. But a man of Frazier's money and power has options; aliases, overseas accounts, the ability to change his appearance. Heartbreak and regret are his constant companions through the continents and the years until he can truly see what he has become. Praise for Robert Silverberg and his short stories. An alien race makes a chilling first impression in this story that evokes difficult moral issues from the Hugo and Nebula Award winning author. SF Site. A corporate ship's complicated business venture involves the experimental use of new technology to scoop a sample from the core of a neutron star. The discovery of a dead civilization on a nearby solar system serves as a fascinating distraction. The same can't be said for the alien spaceship circling around them. Becoming the first expedition from Earth to encounter extraterrestrial life is not on the agenda, and the crewmembers find themselves out of their depth. Treading a fine line between diplomacy and danger, the chief executive officer of the mission, a man of Sioux ancestry, decides to open up lines of communication with the aliens. And though they may be more advanced than humanity, the aliens' account of past actions calls to mind a dark age in human history, one that the CEO will make sure is never repeated. Not on his watch. **Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation. Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings. Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences. Although coverage will discuss the science behind the fiction from the Classical Age to the present, focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future. As scientific developments alter expectations for the future, the literature absorbs, uses and adapts such contextual visions. The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines. Although the main focus is on literature, other forms of science fiction including film and video games are explored and because science is an international matter, works from non-English speaking countries are discussed as needed.

**Journey from the Dead Room** Carmen MacGarrigle, 1998 **Tom O'Bedlam** Robert Silverberg, 2015-07-28 A tortured man's visions hold the key to mankind's future in Robert Silverberg's post-apocalyptic masterpiece. Life in the blasted wasteland of 2103 California is nasty, brutish and short. If the savage scratchers don't kill you, the poisoned environment will. But one man wanders this desolate landscape and sees beautiful, glorious visions of impossible places and majestic beings not of Earth. Scorned and mocked as a madman, Tom doubts his sanity until his visions mysteriously begin to spread to others and a returning star probe offers evidence that they are real. Now, as a new religion is born with Tom as its reluctant messiah, violent forces are unleashed, forces that have the power to transform humanity or destroy it.
