Hotel Warriors Covering The Gulf War:

Hotel Warriors John J. Fialka, 1992-03-01 In this volume whose title refers to the correspondents who covered the Persian Gulf war from posh hotels in Riyadh and Dhahran Wall Street Journal reporter Fialka ably chronicles the day to day difficulties faced by reporters ranging from sheer incompetence to outright obstruction on the part of the U S Army and demonstrates the woeful inadequacy of the pool system set up by the military and the press In large part he lambastes the Army for its refusal to accommodate journalists and its general attitude of hostility toward the press In contrast the Marines flair for self promotion resulted in coverage more extensive than their military role in the war warranted Fialka attributes a good deal of this attitude to the military's lingering distrust of the media rooted in the Vietnam War experience While there was little overt censorship most of the material written and photographed during the Gulf war was never seen by the American public and Fialka says the Army was shortchanged in accounts of its speedy victory Most important says Fialka the acrimonious relationship between the military and the media bodes ill for future collaborations between the two

The Troubled Path to the Pentagon's Rules on Media Access to the Battlefield: Grenada to Today, *War and Photography* Caroline

Brothers, 2013-03-07 Drawing on the work of Barthes Eco Foucault Baudrillard Burgin and Tagg and on the historians of mentalities *War and Photography* presents a theoretical approach to the understanding of press photography in its historical and contemporary context Brothers applies her argument with special reference to French and British newspaper images of the Spanish Civil War a selection of which is presented in the book Rejecting analyses based upon the content of the images alone she argues that photographic meaning is largely predetermined by its institutional and cultural context Acting as witnesses despite themselves photographs convey a wealth of information not about any objective reality but about the collective attitudes and beliefs particular to the culture in which they operate

The Brave Women of the Gulf Wars Karen Zeinert, Mary Miller, 2005-07-15 Traces the roots of the Persian Gulf War and the role women played in the military as

correspondents as medics and on the homefront *Propaganda, the Press and Conflict* David R. Willcox, 2005-09-19 An incisive analysis of the use of the press for propaganda purposes during conflicts using the first Gulf War and the intervention in Kosovo as case studies As the contemporary analysis of propaganda during conflict has tended to focus considerably upon visual and instant media coverage this book redresses the imbalance and contributes to the growing discourse on the role of the press in modern warfare Through an innovative comparative analysis of press treatment of the two conflicts it reveals the existence of five consistent propaganda themes portrayal of the leader figure portrayal of the enemy military threat threat to international stability and technological warfare As these themes construct a fluid model for the analysis and understanding of propaganda content in the press during conflicts involving British forces they also provide the background against which the author can discuss general issues regarding propaganda Amongst the issues which have become increasingly relevant to both recent academic debate and popular culture the author tackles the role of the journalist in war coverage the place of the press in a news market dominated by instant visual media and the effectiveness of propaganda in specific cultural and political context This book will appeal to advanced students and researchers in war studies media studies propaganda and psychology *Media Bias?* Tawnya J. Adkins Covert, Philo C. Wasburn, 2009-01-01 *Media Bias* addresses the question To what extent can mainstream news media be characterized as conservative or liberal The study involves a systematic comparative analysis of the coverage given to major domestic social issues from 1975 to 2000 by two mainstream newsmagazines Newsweek and Time and two explicitly partisan publications the conservative National Review and the liberal Progressive Working from the idea that some biased accounts of social issues can perform several positive functions for the maintenance and vitality of political democracy Adkins Covert and Wasburn offer a new methodology for analyzing bias empirically one that is capable of producing valid and reliable findings They begin by defining the meaning of bias and discuss possible methods of measuring media bias empirically and systematically By comparing each publication's coverage on poverty crime the environment and gender issues in which the line between the conservative and liberal positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society *Politics and the Press* Pippa Norris, 1997 Contains 12 contributions including some original research by scholars journalists and media executives at Harvard's Joan Shorenstein Center Contributions focus on the influence of the press on the policy apparatus of government and the impact of economics and changes in communications technology on news reporting The volume also includes perspectives on minorities and women as members of the news industry Annotation copyrighted by Book News Inc Portland OR *U. S. Army and the Media in the 20th Century* Robert T. Davis, 2011 This is a print on demand edition of a hard to find publication Surveys the U S Army's approach to media relations from the Spanish American War to the first Gulf War The relationship between the Army and the media is considered in the broader context of the U S Government's approach to info mgmt IM Here is an

overview of how the U S Army has approached its relations with the media over the previous century Since World War I a number of bureaucratic manifestations of IM have been tried in wartime With the exception of the U S Info Agency whose tenure spanned the period from 1953 to 1999 all the other manifestations of bureaucratic IM rose and fell during the wars in which they were created The need for units in the field to participate in IM is a major challenge for future operations Illus

The US Army and the Media in the 20th Century Robert T. Davis, 2009 Surveys the US Army's approach to media relations from the Spanish American War to the first Gulf War The relationship between the Army and the media is considered in the broader context of the US Government's approach to information management Given the growing importance of information operations in 21st century warfare this study provides a succinct overview of how the US Army has approached its relations with the media over the previous century The study highlights the recurrent tension that exists in both the Army and the US Government's information management writ large This tension arises from the need for operational security and effective deception and psychological operations and the need to provide transparency to secure public acceptance and support for military operations The long running debate over how the Government's information management should be organized and operated reflects this tension Thus since World War I a number of bureaucratic manifestations of information management have been tried in wartime including the Committee on Public Information the Office of War Information the Psychological Strategy Board the United States Information Agency and most recently the Office of Global Communications With the exception of the United States Information Agency whose tenure spanned the period from 1953 to 1999 all the other manifestations of bureaucratic information management rose and fell during the wars in which they were created The growing pains of these organizations sometimes colored the Army's relationship with the media The need for units in the field to participate in information management is a major challenge for future operations This study reminds us that those commanders who have gone out of their way to engage the media have in many cases had the greatest success with information management

Anti-Social Media Kevin Foster, 2021-08-31 Over the past decade the gravitational centre of contemporary conflict has shifted from the physical battlefield to the online battlespace where the ingenuity of non state actors has vexed governments and tested their militaries Devising new architectures of participation Al Qaeda and ISIS have weaponised social media and empowered their dispersed followers to organise communicate and dominate the information domain Kevin Foster shows how conventional militaries in the US Britain Israel and Australia have responded to this challenge by integrating social media into their systems and operations and the organisational and cultural impediments they have confronted Foster traces each military's social media journey appraising the strategies doctrine and policies developed to regulate its management and use From the ADFA Skype sex scandal to the IDF's sophisticated integration of the real and virtual spaces of war Anti Social Media examines the good the bad and the indifferent in the armed forces halting advance towards social media competence

Arnold,2018-05-18 This unprecedented compilation of eyewitness accounts records the thoughts and emotions of American soldiers spanning nearly 250 years of national history from the American Revolution to the Afghanistan War Understanding primary sources is essential to understanding warfare This outstanding collection provides a diverse set of eyewitness accounts of Americans in combat throughout U S history Offering riveting true stories it includes accounts from participants in the American Revolution the War of 1812 the Indian Wars the Mexican American War the Civil War the Spanish American War and Philippine Insurrection World War I World War II the Korean War the Vietnam War The Persian Gulf War the Afghanistan War and the Iraq War Most eyewitness accounts of war currently available to the public are those of writers who enjoy higher military rank Americans at War addresses this imbalance between officers accounts and enlisted men s accounts by invoking oral history archives Contextual essays and timelines allow the reader to place the accounts in time and place while the entries themselves allow the reader to experience the thoughts and emotions of Americans who engaged in combat Memory and the Wars on Terror Jessica Gildersleeve,Richard Gehrmann,2017-10-24 This edited collection aims to respond to dominant perspectives on twenty first century war by exploring how the events of 9 11 and the subsequent Wars on Terror are represented and remembered outside of the US framework Existing critical coverage ignores the meaning of these events for people nations and cultures apparently peripheral to them but which have as shown in this collection been extraordinarily affected by the social political and cultural changes these wars have wrought Adopting a literary and cultural history approach the book asks how these events resonate and continue to show effects in the rest of the world with a particular focus on Australia and Britain It argues that such reflections on the impact of the Wars on Terror help us to understand what global conflict means in a contemporary context as well as what its representative motifs might tell us about how nations like Australia and Britain perceive and construct their remembered identities on the world stage in the twenty first century In its close examination of films novels memoir visual artworks media and minority communities in the years since 2001 this collection looks at the global impacts of these events and the ways they have shaped and continue to shape Britain and Australia s relation to the rest of the world

From Pigeons to News Portals David D. Perlmutter,John Maxwell Hamilton,2007-11-01 Ever since the invention of the telegraph journalists have sought to remove the barriers of time and space Today we readily accept that reporters can jet

quickly to a distant location and broadcast instantly from a satellite connected video enabled cell phone hanging from their belts But now that live news coverage is possible from virtually anywhere is foreign correspondence better And what are the implications of recent changes in journalistic technology for policy makers and their constituents In *From Pigeons to News Portals* edited by David D Perlmutter and John Maxwell Hamilton scholars and journalists survey probe and demystify the new foreign correspondence that has emerged from rapidly changing media technology These distinguished authors challenge long held beliefs about foreign news coverage not the least of which is whether in our interconnected world such a thing as foreign news even exists anymore Essays explore the ways people have used new media technology from satellites and cell phones to the Internet to affect content delivery modes and amount and style of coverage They examine the ways in which speedy reporting conflicts with in depth reporting the pros and cons of parachute journalism the declining dominance of mainstream media as a source of foreign news and the implications of this new foreign correspondence for foreign policy Entertainment media such as film television and video gaming form worldwide opinions about America often in negative ways Meanwhile live reporting abroad is both a blessing and curse for foreign policy makers Because foreign news is so vital to effective policy making and citizenship we imperil our future by failing to understand the changes technology brings and how we can wrest the best practice out of those changes This provocative volume offers valuable insights and analyses to help us better understand the evolving state of foreign news

Media and Political Conflict Gadi Wolfsfeld, 1997-04-24 The news media have become the central arena for political conflicts today It is therefore not surprising that the role of the news media in political conflicts has received a good deal of public attention in recent years *Media and Political Conflict* provides readers with an understanding of the ways in which news media do and do not become active participants in these conflicts The author's political contest model provides an alternative approach to this important issue The best way to understand the role of the news media in politics he argues is to view the competition over the news media as part of a larger and more significant contest for political control The book is divided into two parts While the first is devoted to developing the theoretical model the second employs this approach to analyse the role of the news media in three conflicts the Gulf war the Palestinian intifada and the attempt by the Israeli right wing to derail the Israeli Palestinian peace accord

Al Jazeera and the Global Media Landscape Tine Ustad Figenschou, 2013-10-15 This book analyzes how and why Al Jazeera English AJE became the channel of choice to understand the massive protests across the Arab world 2011 Aiming to explain the Al Jazeera moment it tracks the channel's bumpy road towards international recognition in a longitudinal in depth analysis of the channel's editorial profile and strategies Studying AJE from its launch in mid November 2006 to the Arab Spring it explains and problematizes the channel's ambitious editorial agenda and strategies examines the internal conflicts practical challenges and minor breakthroughs in its formative years The Al Jazeera phenomenon has received massive attention but it remains under researched The growth of transnational satellite television has transformed the global media landscape into a

complex web of multi vocal multimedia and multi directional flows Based on a combination of policy production and content analysis of comprehensive empirical data the book offers an innovative perspective on the theorization of global news contra flows By problematizing the distinctive characteristics of AJE it examines the strategic motivation behind the channel and the ways in which its production processes and news profile are meant to be different from its Anglo American competitors These questions underscore a central nexus of the book the changing relationship between transnational satellite news and power

War 2.0 Thomas Rid, Marc Hecker, 2009-05-14 War 2 0 Irregular Warfare in the Information Age argues that two intimately connected grassroots trends the rise of insurgencies and the rise of the web are putting modern armies under huge pressure to adapt new forms of counterinsurgency to new forms of social war After the U S military transformed into a lean lethal computerized force faltered in Iraq after 2003 a robust insurgency arose Counterinsurgency became a social form of war indeed the U S Army calls it armed social work in which the local population was the center of gravity and public opinion at home the critical vulnerability War 2 0 traces the contrasting ways in which insurgents and counterinsurgents have adapted irregular conflict to novel media platforms It examines the public affairs policies of the U S land forces the British Army and the Israel Defense Forces Then it compares the media related counterinsurgency methods of these conventional armies with the methods devised by their irregular adversaries showing how such organizations as al Qaeda the Taliban and Hezbollah use the web not merely to advertise their political agenda and influence public opinion but to mobilize a following and put violent ideas into action
