Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects Data is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English speaking readership. Reviews of the Previous Edition: Neufert's Architects Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. Cesar Pelli. With this thorough rewrite, Neufert has produced yet again an invaluable reference book. The Architects Journal. *Catalogue of Publications Issued by the Government of the United States*. United States. Superintendent of Documents, 1941-07. Dwelling House Construction, fifth edition Albert G.H. Dietz, 1992-07-08. In print since 1948. Dwelling House Construction is a homebuilding classic that covers site inspection, foundations, framing, windows, roofing and flashing, coatings, fireplaces and chimneys, insulation, hardware, plastics, mobile homes and manufactured housing. This new edition has been substantially revised to take into account the many changes in materials and building technologies that have occurred over the past decade. The chapter on roofing has been completely revised. The chapters on coatings and plastics have been combined as have those on manufactured and mobile housing. Sections on masonry, wood, steel, steel framing and concrete have been added. The sections on septic tanks, balloon framing, braced framing, plaster and standard requirements have been shortened and specification clauses have been eliminated.

Vernacular Heritage and Earthen Architecture Mariana Correia, Gilberto Carlos, Sandra Rocha, 2013-10-04. In a continuously changing world, there has been a growing interest in the protection of vernacular heritage and earthen architecture. The need to protect and enhance this fragile heritage via intelligent responses to threats from nature and the environment has become evident. Historically, vernacular heritage research focussed on philosophical aspects.

How to Design & Build Your Own House Phyllis Sperling, 1987. Nearly eight hundred drawings enhance step by step instructions in every aspect and phase of planning and constructing one's own home.

Building the Great Stone Circles of the North Colin Richards, 2013-11-30. Of all prehistoric monuments, few are more emotive than the great stone circles that were built.

throughout Britain and Ireland From the tall elegant pointed monoliths of the Stones of Stenness to the grandeur of Stonehenge and the sarsen blocks at Avebury circles of stone exert a magnetic fascination to those who venture into their sphere In Britain today more people visit these structures than any other form of prehistoric monument and visitors stand in awe at their scale and question how and why they were erected Building the Great Stone Circles of the North looks at the enigmatic stone structures of Scotland and investigates the background of their construction and their cultural significance
