From the Trade Paperback edition *The Victory of Reason* Rodney Stark,2007-12-18 Many books have been written about the success of the West analyzing why Europe was able to pull ahead of the rest of the world by the end of the Middle Ages The most common explanations cite the West's superior geography commerce and technology Completely overlooked is the fact that faith in reason rooted in Christianity's commitment to rational theology made all these developments possible Simply put the conventional wisdom that Western success depended upon overcoming religious barriers to progress is utter nonsense In *The Victory of Reason* Rodney Stark advances a revolutionary controversial and long overdue idea that Christianity and its related institutions are in fact directly responsible for the most significant intellectual political scientific and economic breakthroughs of the past millennium In Stark's view what has propelled the West is not the tension between secular and nonsecular society nor the pitting of science and the humanities against religious belief Christian theology Stark asserts is the very font of reason While the world's other great belief systems emphasized mystery obedience or introspection

Christianity alone embraced logic and reason as the path toward enlightenment freedom and progress That is what made all the difference In explaining the West s dominance Stark convincingly debunks long accepted truths For instance by contending that capitalism thrived centuries before there was a Protestant work ethic or even Protestants he counters the notion that the Protestant work ethic was responsible for kicking capitalism into overdrive In the fifth century Stark notes Saint Augustine celebrated theological and material progress and the institution of exuberant invention By contrast long before Augustine Aristotle had condemned commercial trade as inconsistent with human virtue which helps further underscore that Augustine s times were not the Dark Ages but the incubator for the West s future glories This is a sweeping multifaceted survey that takes readers from the Old World to the New from the past to the present overturning along the way not only centuries of prejudiced scholarship but the antireligious bias of our own time The Victory of Reason proves that what we most admire about our world scientific progress democratic rule free commerce is largely due to Christianity through which we are all inheritors of this grand tradition      *Reforming Priests and Parishes* Kathleen Comerford,2006-09-30
