Voss, 2002 The customary division of Latin American history into colonial and modern periods has come into question recently This new book demonstrates that there was a middle period in Latin America s historical evolution since the European Conquest one no longer colonial but not yet modern which has left a legacy in its own right for contemporary Latin America This volume is a narrative text on Latin America s long nineteenth century from the period of Imperial Reforms in the late eighteenth century up to the Great Depression Incorporating local and regional studies from the last three decades which have profoundly broadened and altered customary views about Latin America the book is a synthesis of this Middle Period Latin America in the Middle Period re evaluates the relation between subsistence and market production in the post independence economy stressing regional diversity It also re evaluates the mechanics of politics which customarily have been seen as liberal conservative caudillo oligarchy region nation and merchant landowner industrialist The text discusses the acceleration of the forces of modernization the rise of industrial capitalism and the beginnings of a national ordering of life in the late nineteenth and early twentieth centuries which eroded the fabric of Middle Period society a process consummated in the aftermath of world depression in the 1930s ushering in modern Latin America This new volume is an excellent resource for courses in nineteenth century Latin American history and the second half of Latin American history survey **Latin America's Emerging Middle Classes** J. **Household Mobility and Persistence in Guadalajara, Mexico** Monica L. Hardin, 2016-12-08

1821 Guadalajara Mexico exhibited surprising mobility within its population Using data from the back to back censuses of 1821 and 1822 this study argues that mobility affected almost every individual who lived in Guadalajara during that time period The methodology used traces individuals who persisted from one year to the next to determine overall rates of mobility An analysis of short term stability and change within this set of historically identifiable individuals families and households reveals a process of mobility that not only has been neglected by studies based on aggregate data but that is often at variance with the findings of those studies The evidence shows that a significant portion of the extensive movement of individuals to and from the wards is short term and often cyclical rather than long term and permanent Additionally data sets from 1811 1813 and 1839 1842 are used as control groups to conclude that the mobility in 1821 1822 was not a unique historical event based on circumstances but an overarching trend throughout the nineteenth century

**Masculinities and Femininities in Latin America's Uneven Development** Susan Paulson,2015-08-20 This book forges a new approach to historical and geographical change by asking how gender arrangements and dynamics influence the evolution of institutions and environments This new theoretical approach is applied via mixed methods and a multi scale framework to bring together unusually diverse phenomena Regional trends demonstrated with quantitative data include the massive incorporation of women into paid work demographic masculinization of the countryside and feminization of cities rapidly increasing gaps that favor women over men in education and life expectancy and extraordinarily high levels of violence against men Case studies in Mexico Chile and Bolivia explore changes influenced by gender practices and expectations that involve men in different ways than women they also highlight dissimilarities and power relations between differently positioned masculine groups Ethnographic studies of culturally diverse arrangements together with particular attention to subordinate versus dominant masculinities complicate the gender binaries that circumscribe so much research and policy Drawing attention to imbalances and conflicts generated by inappropriate models and uneven developments the book points to opportunities for experimenting with and adapting the sociocultural institutions that govern relations among humans and between humans and their environment

When Porfirio Díaz extended his modernization initiative in Mexico to the administration of public welfare the families and especially the children of the urban poor became a government concern Reforming the poor through work and by bolstering Mexico's emerging middle class were central to the government's goals of order and progress But Porfirian policies linking families and work often endangered the children they were supposed to protect especially when state welfare institutions became involved in the shadowy traffic of child labor The Mexican Revolution which followed generated an unprecedented surge of social reform that was focused on families and accelerated the integration of child protection into public policy political discourse and private life In ways that transcended the abrupt discontinuities and conflicts of the era Porfirian officials revolutionary leaders and social reformers alike invoked idealized models of the Mexican family as the primary building block of society making families especially those of Mexico's working classes the object of moralizing reform in the name of state construction and national progress Domestic Economies Family Work and Welfare in Mexico City 1884-1943 analyzes family practices and class formation in modern Mexico by examining the ways in which family oriented public policies and institutions affected cross class interactions as well as relations between parents and children *Demography - Volume II* Zeng Yi,2010-11-30 Zeng Yi is a Professor at the Center for the Study of Aging and Human Development and Geriatric Division Dept of Medicine of Medical School and Institute of Population Research and Dept of Sociology Duke University He is also a Professor at the China Center for Economic Research National School of Development at Peking University in China and Distinguished Research Scholar of the Max Planck Institute for Demographic Research MPIDR in Germany He received his doctoral degree from Brussels Free University in May 1986 and conducted post doctoral study at Princeton University in 1986-87 Up to Feb 2008 he has had 81 professional articles written in English published in academic journals or as book chapters in the United States and Europe among them 51 articles were published in anonymous peer reviewed academic journals He has had 85 professional articles written in Chinese and published in China among them 55 articles were published in national top Chinese academic journals He has published sixteen books including five research books as first author such as Family Dynamics in China published by the University of Wisconsin Press one textbook on demographic methods as the sole author two volumes of demographic software and user's manuals as the first author on family status life table analysis six edited books four as the chief editor and two as the second editor such as the 2005 and 2008 books published by Springer for which he served as the chief editor Six of Zeng Yi's published books were written in English one was written in both Chinese and English and the remainders were written in Chinese Zeng Yi has been awarded more than ten national and international academic prizes such as the Dorothy Thomas Prize of the Population Association of America the Harold D Lasswell Prize in Policy Science awarded by the international journal Policy Sciences and Kluwer

Economic Mobility and the Rise of the Latin American Middle Class Francisco H. G. Ferreira,Julian Messina,Jamele Rigolini,Luis-Felipe Lopez-Calva,Maria Ana Lugo,Renos Vakis,Luis Felipe López-Calva,2012-11-09 After decades of stagnation the size of Latin America s middle class recently expanded to the point where for the first time ever the number of people in poverty is equal to the size of the middle class This volume investigates the nature determinants and possible consequences of this remarkable process of social transformation We propose an original definition of the middle class tailor made for Latin America centered on the concept of economic security and thus a low probability of falling into poverty Given our definition of the middle class there are four not three classes in Latin America Sandwiched between the poor and the middle class there lies a large group of people who appear to make ends meet well enough but do not enjoy the economic security that would be required for membership of the middle class We call this group the vulnerable In an almost mechanical sense these transformations in Latin America reflect both economic growth and declining inequality in over the period We adopt a measure of mobility that decomposes the gainers and losers in society by social class of each household The continent has experienced a large amount of churning over the last 15 years at least 43% of all Latin Americans changed social classes between the mid 1990s and the end of the 2000s Despite the upward mobility trend intergenerational mobility a better proxy for inequality of opportunity remains stagnant Educational achievement and attainment remain to be strongly dependent upon parental education levels Despite the recent growth in pro poor programs the middle class has benefited disproportionately from social security transfers and are increasingly opting out from government services Central to the region s prospects of continued progress will be its ability to harness the new middle class into a new more inclusive social contract where the better off pay their fair share of taxes and demand improved public services *The methods and materials of demography* Henry S.
