**House Spiders - Worldwide** Wolfgang Nentwig, Jutta Ansorg, Paula E. Cushing, Yvonne Kranz-Baltensperger, Christian Kropf, 2025-01-03 To avoid any misunderstandings this book is not about spiders as pets but about those spiders that live in our houses and apartments as lodgers Mostly ignored and sometimes wrongly feared there is hardly a building in the world that does not harbour some species of spider What is fascinating is that we always find the same species These spiders must have special adaptations because the humidity in our homes is far too low they are too clean and the food supply is usually scarce However those spiders that have made the leap into our four walls are rewarded with a worldwide right to stay This in turn is due to people's eagerness to trade and migrate worldwide Humans tirelessly transport their belongings and an endless stream of goods around the world in sacks parcels and containers And our domestic spiders as stowaways travel just as tirelessly and unrecognized It is therefore possible to present domestic spiders found throughout the world in a single book as they are essentially the same everywhere The 50 or so most important species and species groups are presented here in a generally understandable way with a detailed profile photos and distribution maps The authors of this book are experts who work at museums universities and in administration in Europe and North America They are not only recognized scientists but have also been avowed spider fans for decades

*Homes at Work* María Carrizosa, 2023-05-22 Following the outbreak of the COVID 19 pandemic working from home became a global phenomenon yet before 2020 it was a relatively understudied practice But in informal settlements the definition of home and employment is completely intertwined which is why there is so much to learn from them For over half a century mainstream theoretical approaches to urban informality dominated by development economics often fail to see this economic and spatial phenomenon jointly Labor studies tend to be space blind and spatial studies often disregard informal employment Profoundly interdisciplinary this work connects scholarship in development public policy labor studies and feminist economics with that in urban studies planning housing architecture and visual studies The book walks the reader behind the closed doors of working homes that make the fabric both social and economic of most cities It applies a visual methodology to reveal their space use intensity and quantify the

extent to which houses in informal settlements fill their inner pores with economic activity and community services The research also revisits urban formalization policies in Latin America and Africa to uncover a fallacious politics of recognition It ultimately argues for a recognition continuum an approach to urban informality that is more practical and fairer The book is of interest to development economists urban scholars public policy specialists time use researchers and architects working on housing employment generation urban livelihoods gender studies and related topics
