Impacts of Participatory Research Projects Rob A. Cramb, 2001 **Participatory Technology Development: A Technique for Indigenous Technical Knowledge Refinement** M. Israel Thomas, T. Rathakrishnan, S.R. Padma, 2012-07-04 The book *Participatory Technology Development A Technique for Indigenous Technical Knowledge Refinement* comprehensively presenting in depth about Participatory Technology Development Experimentation Indigenous wisdom of the farming community perception aspects of farmers scientists and extension personnel towards PTD and Technology transfer process This will enable the different category of users namely the researchers field extension workers NGO personnel student researchers etc to understand the latest advancement in PTD and the ways and means of solving field issues and follow those ideas in their activities Thus the book will certainly satisfy those readers who intensely use it *Farmer Innovation in Africa* Chris Reij, Ann Waters-Bayer, 2014-07-10 One of Africa s major untapped resources is the creativity of its farmers This book presents a series of clear and detailed studies that demonstrate how small scale farmers both men and women experiment and innovate in order to improve their livelihoods despite the adverse conditions and lack of appropriate external support with which they have to contend The studies are based on fieldwork in a wide variety of farming systems throughout Africa and have been written primarily by African researchers and extension specialists Numerous lively examples show how a participatory approach to agricultural research and development that builds on local knowledge and innovation can stimulate the creativity of all involved not only the farmers This approach which recognizes the farmers capacity to innovate as the crucial component of success provides a much needed alternative to the conventional transfer of technology paradigm This book is a rich source of case studies and analyses of how agricultural research and development policy can be changed It presents evidence of the resilience and resolution of rural communities in Africa and will be an inspiration for development workers researchers and policy makers as well as for students and teachers of agriculture environment and sustainable development *South Jersey Farming* Cheryl L. The Experimental Health Program of the United States Department of Agriculture United States. Bureau of Agricultural Economics,1946 **Regenerating Agriculture** Jules N. Pretty,2013-11-05 For the past 50 years the main goal of agriculture has been to increase production at any price using high amounts of fertilizers and pesticides and intensive industrial methods This has caused damage to the environment and widespread rural depopulation This study shows that there is a viable alternative a form of agriculture which conserves resources maintains rural employment and minimizes the external costs without loss of productivity Using case studies from industrialized and developing countries the author describes the new technical institutional and policy options available

Risk Management for Maize Farmers in Drought Prone Areas of Southern Africa ,1999 **Farming Systems Research into the 21st Century: The New Dynamic** Ika Darnhofer,David Gibbon,Benoît Dedieu,2012-05-30 Farming Systems Research has three core characteristics it builds on systems thinking it depends on the close collaboration between social and biophysical sciences and it relies on participation to build co learning processes Farming Systems Research posits that to contribute towards sustainable rural development both interdisciplinary collaborations and local actor engagement are needed Together they allow for changes in understanding and changes in practices This book gives an overview of the insights generated in 20 years of Farming Systems Research It retraces the emergence and development of Farming Systems Research in Europe summarises the state of the art for key areas and provides an outlook on new explorations especially those tackling the dynamic nature of farming systems and their interaction with the natural environment and the context of action Traditional and Modern Natural Resource Management in Latin America Francisco J. Pichon,John Frechione,Jorge E. Uquillas,1999-10-15 Traditional and Modern Natural Resource Management in Latin America identifies a major problem facing developing nations and the countries and sources that fund them the lack of attention and or effective strategies available to prevent farmers in underdeveloped and poorly endowed regions from sinking still deeper into poverty while avoiding further degradation of marginal environments The contributors propose an alliance of scientific knowledge with native skill as the best way to proceed arguing that folk systems can often provide effective management solutions that are not only locally effective but which may have the potential for spatial diffusion While this has been said before the volume makes one of the best articulated statements of how to implement such an approach In this book which stems from a workshop held in 1995 at the World Bank the editors make an eloquent case for the relevance of risk prone areas as a subject of study and the special role that indigenous knowledge plays in such poorly endowed regions The volume is balanced it does

not advocate one approach over another and it is multidisciplinary including work by anthropologists sociologists geographers and natural scientists The nine chapters create a natural progression from conceptual issues to theory applications and synthesis and contain a wealth of data analyses recommendations and carefully considered opinions by experts who have been intimately involved over the long term in theoretical and practical work related to systems of natural resource management in Latin America The volume addresses the topic of sustainability in a logical manner considering practical concerns and lessons as well as theoretical perspectives A number of conceptual and case studies highlight approaches that might succeed if World Bank and other multilateral and national funding sources are forthcoming

Traditional and Modern Natural Resource Management in Latin America addresses a topic that has gained worldwide interest especially in relation to indigenous knowledge systems
