throughout First the accounting system is profitably thought of as a library of financial statistics Answers to a variety of questions are unlikely to be found in prefabricated format but valuable information awaits those equipped to in the accounting library is most interrogate the library Second the information unlikely to be the only information at the manager's disposal So knowing how to combine accounting and nonaccounting bits of information is an important indeed indispensable managerial skill Finally the role of a professional manager is emphasized This is an individual with skill talent and imagination an individual who brings professional quality skills to the task of managing This book also makes demands on the reader It assumes the reader has had prior exposure to financial accounting economics statistics and the economics of uncertainty in the form of risk aversion and decision trees A modest acquaintance with strategic or equilibrium modeling is also presumed as is patience with abstract notation The book does not make deep mathematical demands on the reader An acquaintance with linear programming and the ability to take a simple derivative are presumed The major prerequisite is a tolerance for if not a predisposition toward abstract notation This style and list of prerequisites are not matters of taste or author imposition
