## Joseph Paxton:

**A Thing in Disguise: The Visionary Life of Joseph Paxton (Text Only)** Kate Colquhoun, 2012-08-02 A biography of an unsung Victorian hero Joseph Paxton was the man behind the garden design at Chatsworth and the Crystal Palace at the Great Exhibition of 1851

**Joseph Paxton** John Anthony, 2008-03-04 Joseph Paxton is best known as the designer of the Crystal Palace built to house the Great Exhibition held in Hyde Park in 1851 But he had many achievements to his credit in the course of a varied career Born in humble circumstances he became head gardener to the Duke of Devonshire at the age of 23 and rapidly became leading horticulturist of the day He was MP for Coventry for eleven years organised a civilian works corps to help the army in the Crimea and concerned himself with the sewage and traffic problems of London

Bourgeois and Aristocratic Cultural Encounters in Garden Art, 1550-1850 Michel Conan, 2002 Developments in garden art cannot be isolated from the social changes upon which they either depend or have some bearing Bourgeois and Aristocratic Cultural Encounters in Garden Art 1550 1850 offers an unparalleled opportunity to discover how complex relationships between bourgeois and aristocrats have led to developments in garden art from the Renaissance into the Industrial Revolution irrespective of stylistic differences These essays show how garden creation has contributed to the blurring of social boundaries and to the ongoing redefinition of the bourgeoisie and the aristocracy Also illustrated is the aggressive use of gardens by bourgeois in more or less successful attempts at subverting existing social hierarchies in renaissance Genoa and eighteenth century Bristol England as well as the opposite as demonstrated by the king of France Louis XIV who claimed to rule the arts but imitated the curieux fleuristes a group of amateurs from diverse strata of French society Essays in this volume explore this complex framework of relationships in diverse settings in Britain France Biedermeier Vienna and renaissance Genoa The volume confirms that gardens were objects of conspicuous consumption but also challenges the theories of consumption set forth by Thorstein Veblen and Pierre Bourdieu and explores the contributions of gardens to major cultural changes like the rise of public opinion gender and family relationships and capitalism Garden history then informs many of the debates of contemporary cultural history ranging from rural management practices in early seventeenth century France to the development of a sense of British pride at the expansive Vauxhall Gardens favored equally by the legendary Frederick Prince of Wales and by the teeming London masses This volume amply demonstrates the varied and extensive contributions of garden creation to cultural exchange between 1550 and 1850 Publisher s description

Chadwick, 1961 *A History of Interior Design* John F. Parliament. House of Commons,1862      **Paradise Planned** Robert A.M. Stern,David Fishman,Jacob Tilove,2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape      *Heads of Families at the First Census of the United States Taken in the Year 1790* United States. Bureau of the Census,1908      **The Florist and Pomologist** ,1865      *The Real World of Victorian Steampunk* Simon Webb,2019-02-28 A look at the surprising nineteenth century technology that inspires this literary and cultural movement I was very impressed by this book SF Crowsnest In recent decades steampunk has grown from a rather obscure subgenre of science fiction into a striking and distinctive style of fashion art design and even music It is in the written word however that steampunk has its roots and in this book Simon Webb explores and examines the real inventions that underpin the fantasy In doing so he reveals a world unknown to most people today Webb reveals the Victorian era as a surprising place one of steam powered airplanes fax machines linking Moscow and St Petersburg steam cars traveling at over 100 mph electric taxis and wireless telephones It is in short the nineteenth century as you ve never before seen it a steampunk extravaganza of anachronistic technology and unfamiliar gadgets Imagine Europe spanned by a mechanical internet a telecommunication system of clattering semaphore towers capable of transmitting information across the continent in a matter of minutes Consider too the fact that a steam plane the size of a modern airliner took off in England in 1894 Drawing entirely on contemporary sources we see how little known developments in technology have been used as the basis for so many steampunk narratives From seminal novels such as *The Difference Engine* to the steampunk fantasy of Terry Pratchett s later works this book shows that steampunk is at least as much solid fact as it is whimsical fiction

**Function and Fantasy: Iron Architecture in the Long Nineteenth Century** Paul Dobraszczyk,Peter Sealy,2016-07-01 The introduction of iron and later steel construction and decoration transformed architecture in the nineteenth century While the structural employment of iron has been a frequent subject of study this book re directs scholarly scrutiny on its place in the aesthetics of architecture in the long nineteenth century Together its eleven unique and original chapters chart for the first time the global reach of iron s architectural reception from the first debates on how iron

could be incorporated into architecture's traditional aesthetics to the modernist cleaving of its structural and ornamental roles. The book is divided into three sections. *Formations* considers the rising tension between the desire to translate traditional architectural motifs into iron and the nascent feeling that iron buildings were themselves creating an entirely new field of aesthetic expression. *Exchanges* charts the commercial and cultural interactions that took place between British iron foundries and clients in far-flung locations such as Argentina, Jamaica, Nigeria, and Australia. *Expressing* colonial control as well as local agency, iron buildings struck a balance between pre-fabricated functionalism and a desire to convey beauty, value, and often exoticism through ornament. *Transformations* looks at the place of the aesthetics of iron architecture in the late nineteenth and early twentieth centuries, a period in which iron ornament sought to harmonize wide social ambitions while offering the tantalizing possibility that iron architecture as a whole could transform the fundamental meanings of ornament. Taken together, these chapters call for a re-evaluation of modernism's supposedly rationalist interest in nineteenth-century iron structures, one that has potentially radical implications for the recent ornamental turn in contemporary architecture.
