Social Security Bulletin , **Economic Actors, Economic Behaviors, and Presidential Leadership** C. Damien Arthur,2014-07-22 There is considerable disagreement about whether the U S president has a direct and measurable influence over the economy The analysis presented in Economic Actors Economic Behaviors and Presidential Leadership The Constrained Effects of Rhetoric suggests that while presidents have increased their rhetoric regarding the economy they have not had much success in shaping it Considering this research Arthur argues that the president s decision to address the economy so often must stem from a symbolic placation or institutional necessity that is intended to comfort constituencies or somehow garner electoral advocacy from the party s base No other viable explanation exists given the lack of results presidents obtain from discussing the economy and their persistent determination to do so This discrepancy suggests that presidential rhetoric on the economy is at best a tool used to appear concerned to everyone and toe the party line to their base Arthur presents an overview of economic rhetoric from the presidential office that will be of interest to scholars of the economy and political communication

The Journal of the Engineering Institute of Canada Engineering Institute of Canada,1922 The Engineering Journal ,1921 NBS Monograph ,1962 Household Mobility and Persistence in Guadalajara, Mexico Monica L. Hardin,2016-12-08 1821 Guadalajara Mexico exhibited surprising mobility within its population Using data from the back to back censuses of 1821 and 1822 this study argues that mobility affected almost every individual who lived in Guadalajara during that time period The methodology used traces individuals who persisted from one year to the next to determine overall rates of mobility An analysis of short term stability and change within this set of historically identifiable individuals families and households reveals a process of mobility that not only has been neglected by studies based on aggregate data but that is often at variance with the findings of those studies The evidence shows that a significant portion of the extensive movement of individuals to and from the wards is short term and often cyclical rather than long term and permanent Additionally data sets from 1811 1813 and 1839 1842 are used as control groups to conclude that the mobility in 1821 1822 was not a unique historical event based on circumstances but an overarching trend throughout the nineteenth century
