Congress. House. Committee on Energy and Commerce. Subcommittee on Health and the Environment, 1983 Hospital City, Health Care Nation Guian A. McKee, 2023-03-07 Hospital City Health Care Nation recasts the story of the U S health care system by emphasizing its economic social and medical importance in American communities Focusing on urban hospitals and academic medical centers the book argues that the country s high level of health care spending has allowed such institutions to become vital if often problematic economic anchors for communities Yet that spending has also constrained possibilities for comprehensive health care reform over many decades even after the passage of the Affordable Care Act in 2010 At the same time the role of hospitals in urban renewal in community health provision and as employers of low wage workers has contributed directly to racial health disparities Guian A McKee explores these issues through a detailed historical case study of Baltimore s Johns Hopkins Hospital while also tracing their connections across governmental scales local state and federal He shows that health care spending and its consequences rather than insurance coverage alone are core issues in the decades long struggle over the American health care system In particular Hospital City Health Care Nation points to the increased role of financial capital after the 1960s in shaping not only hospital growth but also the underlying character of these vital institutions The book shows how hospitals quest for capital has interacted with structural racism and inequality to shape and constrain the U S health care system Building on this reassessment of the hospital system its politics and its financing Hospital City Health Care Nation offers ideas for the next steps in health care reform Administration's Fiscal Year 1983 Economic Program United States. Warren Salmon, 2021-06-23 This new volume illuminates the growing corporate in roads into the health care system and its probable consequences especially for physicians and other practitioners Its fourteen contributors examine both the delivery and supply functions in the health sector in America Ambulatory care hospitals health maintenance organizations and health promotion activities are each critically dissected A major thrust of the investigations focuses upon implications for the

medical profession principally how the increased scrutiny over clinical decision making by corporate purchasers and payors threatens the traditional role and relative autonomy of physicians Varying theoretical perspectives are debated with an additional Canadian perspective offered **Administration's Fiscal Year 1983 Budget Proposal** United States.
