Leadership Succession Stewart D. Friedman, 2017-09-04 This volume focuses on the most critical strategic activity in any organization namely who gets chosen to sit in the top echelon of the pyramid Friedman argues that it is the quality of corporate leadership that will determine corporate winners and losers in the global competitive game The stakes in leadership succession are high The selection of key figures is the one human resource activity that no one belittles for being of secondary importance Indeed leadership succession is so important and central in many executive minds that it crowds out any other work The succession process is often fraught with political intrigue it lacks discipline and excludes meaningful involvement of senior human resource executives The contributors to this imaginative volume reveal a succession planning process that is frequently sloppy superficial and regularly sabotaged by senior management when they give it short shrift in terms of quality time In addition senior management often overrides sound decisions when it comes to filling key positions The result is a lack of integrity throughout the human resource systems that eventually leads to a collapse of belief in the system and its governance Noel M Tichy a leading figure in the studies of human resource management has said Stewart Friedman is to be congratulated for a successful effort in providing a state of the art look at leadership succession He provides us with an empirical database of what is happening in U S corporations helpful prescriptions for future improvement of leadership succession and a realistic assessment of the human resource executive challenges in this area

The importance of records in modern society is explored by re-examining some of the historical antecedents for critical functions in the modern records professions. The motivation for writing this book comes from a conviction of the importance of records and records professionals in organizations and society as well as the need to possess a stronger sense of the events, trends, people, debates, and controversies producing the modern records professions. Archivists and records managers have tended to discount the importance of their historical antecedents, ignoring the fact that many of the current debates and issues before the profession are not new but embedded in the historical evolution of the records professions. Re-examining some of the historical origins helps records professionals to re-examine their mission to manage records for the benefit of organizations and of all of society. Such re-evaluation also helps to remind records professionals and others that the concerns generated by new electronic recordkeeping technologies are not new at all but built deep within the fabric of traditional records creation and administration.
