*Hothouse Earth* John Gribbin,1990-10      Hothouse Earth John R. Gribbin,1990      **Hothouse Earth** John Gribbin,1992-01-28 Examines global warming as a result of human activities against a broader background of natural climatic processes British science writer Gribbin explains why the world is getting warmer what the change in temperature and rainfall patterns will mean for human society and what can and must be done to slow the pace of these changes Annotation copyrighted by Book News Inc Portland OR      Hothouse Earth John Gribbin,1990      **The Matter Myth** Paul Davies,John Gribbin,2007-10-23 In this sweeping survey acclaimed science writers Paul Davies and John Gribbin provide a complete overview of advances in the study of physics that have revolutionized modern science From the weird world of quarks and the theory of relativity to the latest ideas about the birth of the cosmos the authors find evidence for a massive paradigm shift Developments in the studies of black holes cosmic strings solitons and chaos theory challenge commonsense concepts of space time and matter and demand a radically altered and more fully unified view of the universe      A Feminist Companion to the Apocalypse of John Amy-Jill Levine,Maria Mayo Robbins,2010-07-05 An examination of New Testament Apocalyptic literature through the categories of post colonial thought deconstruction ethics Roman social discourse masculinisation virginity and violence      **Panicology** Simon Briscoe,Hugh Aldersey-Williams,2009-05 In the spirit of Freakonomics a smart pop guide for determining the real level of danger behind many media hyped      **Regenerating America with Sustainable Economics** James A. George,James A. Rodger,2017-08-25 To be successful a nation must have a sustainable economy something the United States of America does not have in place James A George and James A Rodger suggest attributes for a new economic model that advocates sustainable capitalism The model embraces the Genuine Progress Indicator and triple bottom line accounting The authors explore important topics including causes of the global economic crisis during the presidency of George W Bush insights on how President Donald Trumps administration is approaching economic problems ways all citizens can work together to ensure we meet our optimum potential and strategies to achieve balance among economic social and environmental needs While most people think that sustainable economics is all about climate change the authors take a much broader view noting that without economic security there can be no military security and no homeland security America has enjoyed prosperity but too many citizens continue to live in poverty We can all earn a better return on our national resources by educating ourselves and Regenerating America with Sustainable Economics      **Gaia, an Atlas of Planet Management** Norman Myers,1993 For the first time since its publication in 1984 a completely updated and revised edition of this best selling atlas which brings it into the 1990s incorporating the new events issues and statistics of the past decade      **The Birth of Time** John Gribbin,1999-01-01 Gribbin takes us through the history of cosmological discoveries focusing in particular on the seventy years since the Big Bang model of the origin of the universe He explains how conflicting views of the age of the universe and stars converged in the 1990s because scientists including

Gribbin were able to use data from the Hubble Space Telescope that measured distances across the universe

*The Heavens Are Falling* Walter J. Karplus, 2013-11-11 Each day we are bombarded with news of a new catastrophe of worldwide proportions promising to obliterate a part if not all of humankind Confronted with these warnings of impending doom our best defense is to understand how valid or invalid these predictions of calamity are By perceiving these threats in a wise and sagacious way we can best meet future challenges by not earmarking precious resources for wrong or misleading reasons Walter Karplus a professor of computer sciences at UCLA in his 35 years of experience has made predictions for all kinds of phenomena by generating models and computer simulations His decades of experience have taught him what we can and cannot predict with any accuracy Dr Karplus surveys the most hotly debated catastrophes that many scientists have predicted will imminently endanger the lives of countless people all over the globe These catastrophes include the depletion of the ozone layer the Greenhouse Effect nuclear radiation acid rain the AIDS epidemic the population explosion another Great Depression and earthquakes Drawing on his superb background he assesses the strengths and weaknesses of arguments propounding the seriousness of these calamities All the while he never allows us to lose sight of the profound shortcomings of scientific prediction In his singularly engaging manner Dr Karplus traces the fascinating art of prediction from our earliest ancestors to today He pronounces at what point prediction even within science becomes a black art He elucidates the

problems that computer simulations have in predicting events and goes on to pinpoint when and where these models lapse into the area of pure conjecture Through reason and wit Walter Karplus teaches us how to bring a trained eye to the predictions of disaster that unceasingly assault us The Heavens Are Falling is an illuminating and entertaining work that bestows on us the wisdom to make informed judgments before taking arms against a sea of troubles **Risk** John Adams,2002-09-11 Risk compensation postulates that everyone has a risk thermostat and that safety measures that do not affect the setting of the thermostat will be circumvented by behaviour that re establishes the level of risk with which people were originally comfortable It explains why for example motorists drive faster after a bend in the road is straightened Cultural theory explains risk taking behaviour by the operation of cultural filters It postulates that behaviour is governed by the probable costs and benefits of alternative courses of action which are perceived through filters formed from all the previous incidents and associations in the risk taker s life Risk should be of interest to many readers throughout the social sciences and in the world of industry business engineering finance and public administration since it deals with a fundamental part of human behaviour that has enormous financial and economic implications Timeless Vision Jim Johnson,2024-04-12 Faith and facts are reconciled in this revelatory examination of biblical and secular truths that follows the path to God through science not around it Always a man of science Jim Johnson accepted Christ into his life shortly after his fiftieth birthday This acceptance of God s unseeable power did not shake his belief in science it strengthened it Through years of research on the world s evolution Johnson found that in studying every new hypothesis and theory he believes even more in God s universal role Timeless Vision Understanding God s Creation through the Lens of Science bridges the gap between faith and science Johnson examines the natural progression of Earth s creation alongside the seven biblical days explains the conundrum of time and expands upon the ever evolving relationship humanity has with science and religion Through analyzing scripture with detailed data and using science to bolster Christian beliefs Johnson reveals just how rare and privileged Earth and human life truly are It is through studying science and faith together not apart that we can see how God s plan was developed and why He did it One is not complete without the other Let Johnson lead you down the path less traveled the one of science and faith and show how God gave humanity these ways to discover Him more fully and completely
