Power/knowledge/pedagogy Dennis Carlson, 2018-03-05 The essays in this volume explore the educational implications of unsettling shifts in contemporary culture associated with postmodernism These shifts include the fragmentation of established power blocs the emergence of a politics of identity growing inequalities between the haves and the have nots in a new global economy and the rise in influence of popular culture in defining who we are In the academy postmodernism has been associated with the emergence of new theoretical perspectives that are unsettling the way we think about education These shifts the authors suggest are deeply contradictory and may lead in divergent political directions some of them quite dangerous Power Knowledge Pedagogy examines these issues with regard to four broad domains of educational inquiry state educational policy and curriculum reform student identity formation the curriculum as a text and critical pedagogy The book contributes to the dialogue on the forging of a new commonsense discourse on democratic educational renewal attuned to the changing times in which we live **Textbooks and Teachers' Helps** Emanuel Gamoran, 1923 **Midland Schools**, 1907 **Preparation of Teachers of the Social Studies for the Secondary Schools** Edgar Dawson, Enoch George Payne, James Chidester Egbert, John Charles Muerman, Julia Wade Abbot, Newell Walter Edson, Teresa Bach, Thomas Andrew Storey, Walter Sylvanus Deffenbaugh, Elon Galusha Salisbury, Willard Stanton Small, 1923 **Teachers and Schooling Making A Difference** Pam Christie, Bob Lingard, 2020-08-04 Teachers Schooling Making a Difference takes seriously the question that teachers ask What do I do on Monday and does provide answers From the foreword by Professor Michael Apple University of Wisconsin Education debates are currently dominated by free market ideologists who push privatisation and competition as the answer to every problem regardless of damage to schools and pupils Teachers Schooling Making a Difference shows that we can think about education in a far more productive way Professor R W Connell University of Sydney This book is a lesson in making hope practical It makes a compelling argument for recognising supporting and enabling teachers as central to progressive school reform Professor Jenny Ozga University of Edinburgh What teachers do in the

classroom really matters even though schools cannot compensate fully for difficulties children may face at home and in society Good teachers and good schools have been making a difference in children s lives for generations but what exactly is it that works Based on extensive research in 1000 primary and secondary classrooms this book examines the tough questions about teaching methods curriculum assessment and teachers professionalism The authors isolate the key elements that make the difference in the classroom and offer teachers practical approaches to working with all their students Teachers and Schools Making a Difference is essential reading for teachers and school administrators who want to improve their professional skills and offer a genuinely democratic education

The Teacher as Expert Robert Welker,1992-01-01 At a time of increasing pressure for teachers to become more professional and more technically competent this book examines in a critical fashion whether teachers should be considered experts Written in straightforward and accessible prose Welker examines the concept of expertise through the ideas of notable educational thinkers in the twentieth century beginning with E P Cubberley and George S Counts and concluding with a chapter on critical theory and the ideas of Maxine Greene and Henry Giroux Other chapters examine such thinkers as Willard Waller Daniel Lortie Alan Tom Philip Jackson and Ivan Illich Each chapter establishes an historical and ideological context and evaluates how the social character of the expert matches the responsibilities While the idea of the teacher assuming the role of educational expert is gaining increased credibility in the current reform movement this book shows that the concept fails to describe the senses of moral and social competence required of the teacher Also the notion of the expert teacher might stand in the way of teachers forming the type of public partnerships necessary for them to complete their tasks adequately

Images of Schoolteachers in America Pamela Bolotin Joseph,Gail E. Burnaford,2000-12 This book explores images of schoolteachers in America from the beginning of the 20th century to the present using a wide range of approaches to scholarship and writing It is intended for both experienced and aspiring teachers to use as a springboard for discussion and reflection about the teaching profession and for contemplating these questions What does it mean to be a teacher What has influenced and sustained our beliefs about teachers New in the second edition The focus is shifted to the teaching profession as the 21st century unfolds The volume continues to explore teacher images through various genres oral history narrative literature and popular culture In the second edition the authors place more emphasis on the social political context that has shaped teachers daily experiences and the teaching profession itself In the study of teacher images and schooling the essays draw from feminist research methods and the critical tradition in educational inquiry to probe issues of power and authority race social class and gender The emphasis is on the multidimensionality of teacher images rather than normative characterizations Six totally new chapters have been written for this new edition an invented interview spanning 100 years of school teaching portraits of progressive activist teachers an exploration of teachers in fiction for young adults a retrospective of the satirical cartoon show The Simpsons a study of crusading and caring teachers in films and an overview of progressive classroom practices in the new millennium Seven

chapters have been thoroughly revised to reflect current scholarship and the authors evolving knowledge and interests
