House For Wombats:

A House for Wombats Dugan Burrell, Jane Burrell, Michael Dugan, 1989-11-01 *A House for Wombats* Jane Burrell, Michael Dugan, 1985-01-01 Wombats Barbara Triggs, 2009-07-13 One of Australia's most engaging marsupials the wombat is also one of the most disparaged and least understood. Often depicted as slow muddle-headed and clumsy it can in fact outpace a human or a dog over a short distance. Wombats are quick to learn and superbly adapted to their burrowing way of life. This book gives a full account of how wombats live and the many hazards they face. Dealing mainly with the bare nosed wombat *Vombatus ursinus* it also includes information on the southern hairy nosed wombat *Lasiorchinus latifrons* as well as the northern hairy nosed wombat *Lasiorchinus krefftii* which is one of the world's most endangered animals. The book also gives practical advice on rearing orphan wombats. Completely revised this new edition has over 100 illustrations including 23 colour plates and drawings by Peter Schouten. *Wombat in the House* Kevin Baker, 2009-01-01 Wombats are loveable. They love to cuddle and be cuddled. Why doesn't every human have a wombat? In truth humans never have wombats. Wombats have wombats. Sometimes wombats have humans. This book is the story of a wombat who decided to share a house with a family of humans. Living with Wildlife Tanya Loos, 2024-11-01 Possums in the roof, an echidna in the garden or perhaps a python in the pantry. *Living with Wildlife: A Guide for Our Homes and Backyards* explores commonly asked questions and issues about encounters with wildlife. Taking a wildlife friendly approach Tanya Loos provides practical information, advice and solutions based on current guidance from wildlife rescue organisations and the latest research. *Living with Wildlife* features helpful advice on wildlife rescue both for every day and during extreme weather events as well as common issues such as feeding wildlife, pets and driving. As urbanisation and climate change effects intensify Australian wildlife need our help now more than ever making this a timely guide for successfully living alongside our wild neighbours. London and Its Environs, Including Excursions to Brighton, the Isle of Wight, Etc Karl Baedeker, 1883 **London and Its Environs** Karl Baedeker (Firm), 1883 **Of Marsupials and Men** Alistair Paton, 2022-07-05 A rollicking history of Australia's amateur naturalists from settlement to the present. A fascinating history of Australia's wildlife and the wilder men and women who shot, studied and saved it. Compelling and entertaining. David Hunt. *Of Marsupials and Men* recounts the fascinating and often hilarious history of the men and women who dedicated their lives to understanding Australia's native animals. To the first European colonists Australian wildlife was bewildering. Marsupials and gum trees seemed strange and hostile. Rabbits, sheep and oak trees were familiar and safe. A bustling animal trade soon developed in both directions. Foxes, starlings and other reminders of home were unleashed on the Australian landscape while countless Australian animals found themselves in Europe as stuffed specimens or living curiosities in zoos and private collections. Into this picture stepped a remarkable band of enthusiastic amateurs who were determined to get to know the fauna of the new colony. Equal parts inspiring and outlandish over the next 150 years they would advance scientific understanding and transform public attitudes.

to Australian wildlife From the snake men who fearlessly thrust their arms into hollow logs just to see what might happen to the top secret plan to smuggle a platypus to Winston Churchill at the height of World War II these are their stories

Venom Doc Bryan Grieg Fry, 2015-08-25 Meet venomologist Bryan Grieg Fry the man with one of the most dangerous job in Australia working with the world's most deadly creatures Welcome to the strange and dangerous world of Doctor Venom Imagine a first date involving three weeks in Siberia catching venomous water shrews and later a wedding attended by Eastern European prime ministers and their bodyguards wielding machine guns Then a life of living and working with snakes Lots of very very poisonous snakes and other venomous creatures everything from the Malaysian king cobra to deadly scorpions In this action packed ride through Bryan Grieg Fry's life you'll meet the man who's worked with the world's most venomous creatures in over 50 countries He's been bitten by 26 poisonous snakes and three stingrays and while deep in the Amazon jungle survived a near fatal scorpion sting He's also broken 23 bones including breaking his back in three places and had to learn how to walk again He only works on venom that he has collected himself so the adventures and danger will just keep coming Bryan now divides his time between scientific research and teaching at the University of Queensland and TV filming and collecting expeditions around the world

Topsy-turvy World Kirsty Murray, National Library of Australia, 2012 To the first Europeans who came to Australia everything seemed topsy turvy Christmas was in the summer and trees shed their bark but not their leaves And the animals were bizarre There was a bird that laughed like a donkey and a type of greyhound that bound along on its hind legs like a hare There was an animal in Tasmania whose nocturnal screeches sounded like the devil and a river creature that had a duck's bill at one end and a beaver's tail at the other The Europeans had never seen anything like these animals before and gave them names similar to those of the European creatures they already knew They drew and painted

odd pictures of them showing they did not understand the animals habits In one illustration a wombat is standing on its back legs and in another a Tasmanian tiger is wrestling with a platypus of the same size
