House Of Cards Why Arms Control Must Fail:

House of Cards Colin S. Gray, 1992 If peace breaks out can arms control be far behind According to Colin S Gray this sardonic motto describes events of the 1990s just as well as it did those of the 1920s Gray offers a provocative history of twentieth century attempts at arms limitation as he challenges the fundamental assumptions of arms control theory Arms control has never worked he concludes because it never can Existing approaches to arms control appeal to common sense but they are logically unsound and inherently impractical Gray argues because they fail to take political realities into account He outlines their inadequacies in what he calls the Arms Control Paradox the more motivated nations are to fight one another the less interested they will be in supporting significant arms limitations Under these conditions arms control agreements must be to echo a phrase of George Will s either impossible or unimportant Documenting the naval treaties of the 1920s and 1930s and the initiatives to limit strategic nuclear arms from 1969 to the present Gray seeks to demonstrate that the fortunes of negotiated arms limitation have merely reflected the temperature of international relations rather than influencing those relations National security analysts students and scholars of international relations and others interested in arms control issues will want to read *House of Cards* and debate its conclusions *Strategies of Arms Control* Stuart Croft, 1996 In this groundbreaking analysis Stuart Croft brings the subject of arms control into the era of complex multi polar international relations He moves beyond the narrow definitions of the phenomenon associated with the Cold War to show how it not only has a long past but also a clear future The author begins by tracing the history of agreements between polities over weapons back to ancient times An understanding of this history allows him to put forward a typology of arms control It occurs at the end of major conflicts stabilises balances between states develops norms of behaviour manages weapons proliferation and acts as a tool of international organisations Stuart Croft examines the evolution of these five qualitatively different strategies and applies the typology to arms control agreements in the post Cold War world This definitive new study will be of interest to students in international relations and security studies as well as specialists in these disciplines **Arms Control** Robert E. Williams Jr., Paul R. Viotti, 2012-05-15 Set against a backdrop of terrorism rogue states non conventional warfare and deteriorating diplomacy this encyclopedia offers a comprehensive multidisciplinary up to date reference on the recent history and contemporary practice of arms control and nonproliferation *Arms Control History Theory and Policy* features in depth expert analysis and information on the full spectrum of issues relating to this critical topic The first major reference on arms control in over a decade the two volume set covers historical context contemporary challenges and emerging approaches to diplomacy and human rights Noted experts provide a full spectrum of perspectives on arms control offering insightful analysis of arms control agreements and the people and institutions behind them Volume 1 provides an accessible historical overview of the subject and a more detailed conceptual analysis of the foundations of arms control Volume 2 covers the contemporary and practical issues of arms control focusing on global issues that arms control advocates have been forced to

address with varying degrees of success a burgeoning international trade in conventional weapons a closely related flood of small arms and light weapons used to fuel intrastate conflicts and even genocide and the spread of nuclear weapons to potentially unstable regions of the world

Towards A Nuclear-weapon-free World - Proceedings Of The Forty-fifth Pugwash Conference On Science And World Affairs Joseph Rotblat, Michiji Konuma, 1997-07-01 In this volume scientists write on the desirability and feasibility of eliminating nuclear weapons including reflections 50 years after the destruction of Hiroshima and Nagasaki by atomic bombs The following topics are discussed strategies for preventing the proliferation of weapons of mass destruction ways and means to monitor and control the arms trade the need for global governance specific aspects of security in the Asia Pacific region and interactions between the problems of meeting the world's energy demand reducing environmental pollution and promoting sustainable development

Neorealism Versus Strategic Culture John Glenn, 2018-01-18 The debate between Neorealists and Strategic Culturalists centres on whether it is possible to explain predict state behaviour without taking into account the particular characteristics of the state such as its historical experiences geographical context and cultural constitution This informative debate is encapsulated in the first section of the book which considers the theoretical issues raised by both Neorealism and Strategic Culture These issues are then explored in the second section by assessing their relevance to six country case studies Australia Germany India Japan Nigeria and Russia

US Nuclear Weapons Policy After the Cold War Nick Ritchie, 2008-08-08 This book offers an in depth examination of America's nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in policy It provides a detailed analysis of the complex evolution of policy the factors affecting policy formulation competing understandings of the role of nuclear weapons in US national security discourse and the likely future direction of policy The book argues that US policy has not proceeded in a linear rational and internally consistent direction and that it entered a second post Cold War phase under President George W Bush However domestic political processes and lack of political and military interest in America's nuclear forces have constrained major shifts in nuclear weapons policy This book will be of much interest to students of US foreign policy nuclear proliferation strategic studies and IR in general

Strategic Thinking, Deterrence and the US Ballistic Missile Defense Project Reuben Steff, 2016-04-01 A systematic critical survey of American strategic thinking and the strategic culture in which it is formed In particular this book seeks to interrogate the theory and strategy of nuclear deterrence and its relationship to the concept of missile defence Drawing widely on the theoretical literature in international relations and strategic studies it identifies the key groups that have competed over America's nuclear policy post 1945 and examines how the concept of missile defence went through a process of gestation and intellectual contestation leading to its eventual legitimization in the late 1990s Steff sheds light on the individuals groups institutions and processes that led to the decision

by the Bush administration to deploy a national missile defence shield. Additionally, Steff systematically examines the impact deployment had on the calculations of Russia and China. In the process, he explains that their reactions under the Bush administration have continued into the Obama era, revealing that a new great power security dilemma has broken out. This, Steff shows, has led to a decline in great power relations as a consequence.

The Tet Offensive James J. Wirtz, 2013-07-12

In this account of one of the worst intelligence failures in American history, James J. Wirtz explains why U.S. forces were surprised by the North Vietnamese Tet Offensive in 1968. Wirtz reconstructs the turning point of the Vietnam War in unprecedented detail. Drawing upon Vietcong and recently declassified U.S. sources, he is able to trace the strategy and unfolding of the Tet campaign as well as the U.S. response.

Arms Races in International Politics Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14

This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics, drawing both on theoretical approaches and on the latest historical research. Written by an international team of specialists, it is divided into four sections: before 1914, the interwar years, the Cold War, and extra-European and post-Cold War arms races. Twelve case studies examine land and naval armaments before the First World War, air, land, and naval competition during the 1920s and 1930s, and nuclear as well as conventional weapons since 1945. Armaments policies are placed within the context of technological development, international politics, and diplomacy, and social, political, and economic factors. An extended general introduction and conclusion, and introductions to each section, provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists. *Arms Races in International Politics* addresses two key questions: what causes arms races, and what is the connection between arms races and the outbreak of wars.

The Realism Reader Colin Elman, Michael Jensen, 2014-08-12

The *Realism Reader* provides broad coverage of a centrally important tradition in the study of foreign policy and international politics. After some years in the doldrums, political realism is again in contention as a leading tradition in the international relations sub-field. Divided into three main sections, the book covers seven different and distinctive approaches within the realist tradition: classical realism, balance of power theory, neorealism, defensive structural realism, offensive structural realism, rise and fall realism, and neoclassical realism. The middle section of the volume covers realism's engagement with critiques levelled by liberalism, institutionalism, and constructivism, and the English School. The final section of the book provides materials on realism's engagement with some contemporary issues in international politics, with collections on United States-U.S. hegemony, European cooperation, and whether future threats will arise from non-state actors or the rise of competing great powers. The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume. Offering substantial commentary and analysis, and including enhanced pedagogy to facilitate student learning, *The Realism Reader* will provide a one-stop shop for undergraduates and masters students taking a course in contemporary international relations theory, with a

particular focus on realism *The Sources of Military Doctrine* Barry Posen, 1984 Barry R Posen explores how military doctrine takes shape and the role it plays in grand strategy that collection of military economic and political means and ends with which a state attempts to achieve security Posen isolates three crucial elements of a given strategic doctrine its offensive defensive or deterrent characteristics its integration of military resources with political aims and the degree of military or operational innovation it contains He then examines these components of doctrine from the perspectives of organization theory and balance of power theory taking into account the influence of technology and geography Looking at interwar France Britain and Germany Posen challenges each theory to explain the German Blitzkrieg the British air defense system and the French Army's defensive doctrine often associated with the Maginot Line This rigorous comparative study in which the balance of power theory emerges as the more useful not only allows us to discover important implications for the study of national strategy today but also serves to sharpen our understanding of the origins of World War II **Deterrence and Strategic Culture** Shu Guang Zhang, 2019-06-30 Does strategic thinking on the question of deterrence vary between cultures Should practitioners assume a common understanding of deterrence regardless of national and cultural differences Shu Guang Zhang takes on these questions by exploring Sino American confrontations between 1949 and 1958 Zhang draws on recently declassified U S documents and previously inaccessible Chinese Communist Party records to demonstrate that the Chinese and the Americans had vastly different assessments of each other's intentions interests threats strengths and policies during this period **Alliance Politics** Glenn H. Snyder, 2007 Glenn H Snyder creates a theory of alliances by deductive reasoning about the international system by integrating ideas from neorealism coalition formation bargaining and game theory and by empirical generalization from international history Using cases from 1879 to 1914 to present a theory of alliance formation and management in a multipolar international system he focuses particularly on three cases Austria Germany Austria Germany Russia and France Russia and examines twenty two episodes of intra alliance bargaining Snyder develops the concept of the alliance security dilemma as a vehicle for examining influence relations between allies He draws parallels between alliance and adversary bargaining and shows how the two intersect He assesses the role of alliance norms and the interplay of concerts and alliances His great achievement in *Alliance Politics* is to have crafted definitive scholarly insights in a way that is useful and interesting not only to the specialist in security affairs but also to any reasonably informed person trying to understand world affairs Cooperation under Fire Jeffrey W. Legro, 2013-09-12 Why do nations cooperate even as they try to destroy each other Jeffrey Legro explores this question in the context of World War II the total war that in fact wasn't During the war combatant states attempted to sustain agreements limiting the use of three forms of combat considered barbarous submarine attacks against civilian ships strategic bombing of civilian targets and chemical warfare Looking at how these restraints worked or failed to work between such fierce enemies as Hitler's Third Reich and Churchill's Britain Legro offers a new understanding of the dynamics of World War II and the sources of international cooperation While

traditional explanations of cooperation focus on the relations between actors Cooperation under Fire examines what warring nations seek and why they seek it the preference formation that undergirds international interaction Scholars and statesmen debate whether it is the balance of power or the influence of international norms that most directly shapes foreign policy goals Critically assessing both explanations Legro argues that it was rather the organizational cultures of military bureaucracies their beliefs and customs in waging war that decided national priorities for limiting the use of force in World War II Drawing on documents from Germany Britain the United States and the former Soviet Union Legro provides a compelling account of how military cultures molded state preferences and affected the success of cooperation In its clear and cogent analysis this book has significant implications for the theory and practice of international relations **The Elusive Balance** William Curti Wohlforth, 2023-08-15 Concentrating on the period between 1945 and 1989 The Elusive Balance reevaluates Soviet and U S perceptions of the balance of power William Curti Wohlforth uses a comparative and long term approach to chart the diplomatic history of relations between the two countries He offers new interpretations of the onset course and end of the Cold War and the motivations behind Soviet behavior Revolution and War Stephen M. Walt, 2013-08-07 Revolution within a state almost invariably leads to intense security competition between states and often to war In Revolution and War Stephen M Walt explains why this is so and suggests how the risk of conflicts brought on by domestic upheaval might be reduced in the future In doing so he explores one of the basic questions of international relations What are the connections between domestic politics and foreign policy Walt begins by exposing the flaws in existing theories about the relationship between revolution and war Drawing on the theoretical literature about revolution and the realist perspective on international politics he argues that revolutions cause wars by altering the balance of threats between a revolutionary state and its rivals Each state sees the other as both a looming danger and a vulnerable adversary making war seem both necessary and attractive Walt traces the dynamics of this argument through detailed studies of the French Russian and Iranian revolutions and through briefer treatment of the American Mexican Turkish and Chinese cases He also considers the experience of the Soviet Union whose revolutionary transformation led to conflict within the former Soviet empire but not with the outside world An important refinement of realist approaches to international politics this book unites the study of revolution with scholarship on the causes of war *Crucible of Beliefs* Dan Reiter, 2019-05-15 How do foreign policymakers learn from history When do states enter alliances Why have some small powers chosen to enter alliances whereas others have stayed neutral In Crucible of Beliefs Dan Reiter uses work in social psychology and organization theory to build a formative events model of learning in international politics History does inform the decisions of policymakers he suggests but it is history of a specific sort based on firsthand experience in major events such as wars Tested against balance of threat theory the leading realist explanation of alliance behavior Reiter s formative events model of learning emerges as a far better predictor of states decisions Crucible of Beliefs shows that contrary to balance of threat theory state leaders ignore

the level of international threat and focus instead on avoiding past mistakes and repeating past successes A serious blow to realism these findings demonstrate that to understand the dynamics of world politics it is essential to know how leaders learn from history

Societies and Military Power Stephen Peter Rosen, 2019-05-15 A work with broad implications for theories of comparative strategic behavior and civil military relations *Societies and Military Power* uses the long history of the armies of India as a basis for analyzing whether the character of a given society affects the amount of military power that can be generated by the armies that emerge from that society By examining the changing relationship between ruling elites in the Indian subcontinent and their armed forces the book shows that divisions within society are mirrored within the military even within the contemporary professional military Stephen Peter Rosen explores the proposition that cultural explanations don't sufficiently account for changes in military power whereas social structure does He suggests also that the dynamics of civil military relations in a non Western setting are not explicable without social structural insight He concludes that the comparative study of strategic behavior and military organization has lacked a sound foundation which the social structural explanation offered in this book begins to provide

Winning the Next War Stephen Peter Rosen, 1991 Rosen argues that armies and navies are not forever doomed to fight the last war Rather they are able to respond to shifts in the international strategic situation

The Sources of Military Doctrine Barry R. Posen, 2014-09-10 Barry R Posen explores how military doctrine takes shape and the role it plays in grand strategy that collection of military economic and political means and ends with which a state attempts to achieve security Posen isolates three crucial elements of a given strategic doctrine its offensive defensive or deterrent characteristics its integration of military resources with political aims and the degree of military or operational innovation it contains He then examines these components of doctrine from the perspectives of organization theory and balance of power theory taking into account the influence of technology and geography Looking at interwar France Britain and Germany Posen challenges each theory to explain the German Blitzkrieg the British air defense system and the French Army's defensive doctrine often associated with the Maginot Line This rigorous comparative study in which the balance of power theory emerges as the more useful not only allows us to discover important implications for the study of national strategy today but also serves to sharpen our understanding of the origins of World War II
