Finch, 2015-07-31 This book is a presentation of five fundamental and biblical based principles by which God would have us live our lives They are not original to me only discovered by me They came out of a nine hour seminar that had been developed in the 1980s It is organized by each individual principle along with several chapters which illustrate how these principles can be applied to our financial circumstances To illustrate these principles they are likened to the building of a house Each principle represents a step in the process of building a house At the end of each principle as well as each chapter there is a personal application which I hope will help people apply that principle chapter to their personal lives The book is organized from start to finish on the concept that we are human beings created by a God who have given us a plan by which to live our lives a plan that goes beyond the materialistic focus of most people in the world today It is a book for persons who are willing to discover how God can direct their financial lives to be fulfilled according to His plan which in turn will provide them with a level of fulfillment that can only be found by following His plan Home in the Islands Jan Rensel, Margaret Rodman Critchlow, 1997-09-01 Ordinary houses have extraordinary stories to tell For more than a century anthropologists have been recording these sagas in an attempt to uncover humanity's relationship with the common dwelling Fundamental to the interaction of humans and housing is the way people shape their living spaces even redefining their purposes and meanings their houses in turn influence how people live their lives and perpetuate the cultural structures that produced a given form of shelter The stories draw attention to colonial and missionary agendas local and global economies environmental disasters cultural identities social connections and family continuity as well as personal choices And as the

chapter on homeless Hawaiians shows even those without houses have stories to tell Anthropologists architects environmental designers geographers and historians will welcome this diverse volume on a neglected yet important aspect of change in the lives of Pacific Islanders
