## **Household Chores And Household Choices:**

**Household Chores and Household Choices** Kerri S. Barile, Jamie C. Brandon, 2004-06-25 Discusses the concepts of home house and household in past societies Because archaeology seeks to understand past societies the concepts of home house and household are important Yet they can be the most elusive of ideas Are they the space occupied by a nuclear family or by an extended one Is it a built structure or the sum of its contents Is it a shelter against the elements a gendered space or an ephemeral place tied to emotion We somehow believe that the household is a basic unit of culture but have failed to develop a theory for understanding the diversity of households in the historic and prehistoric periods In an effort to clarify these questions this volume examines a broad range of households a Spanish colonial rancho along the Rio Grande Andrew Jackson's Hermitage in Tennessee plantations in South Carolina and the Bahamas a Colorado coal camp a frontier Arkansas farm a Freedman's Town eventually swallowed by Dallas and plantations across the South to define and theorize domestic space The essays devolve from many disciplines but all approach households from an archaeological perspective looking at landscape analysis excavations reanalyzed collections or archival records Together the essays present a body of knowledge that takes the identification analysis and interpretation of households far beyond current conceptions International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline
