**Contemporary Indian Houses** Sarbjit Bahga, Surinder

Bahga, Yashinder Bahga, 2014-12-17 Contemporary Indian Houses discusses fifty one architect designed built up houses selected from different parts of India They display the diversity of needs tastes and building materials in the context of different weather conditions and social trends Different architectural appearances or external expressions have determined the classification of the houses into five sections This grouping keeps the reader's growing interest in the external aspect of a residential structure The emphasis is on the built form rather than on the interior and its decor Each house is accompanied

by an explanatory text and supplemented by appropriate drawings and photographs to present a comprehensive picture of India's many splendored domestic architecture. Contemporary Indian Houses is a well illustrated document of changing trends in architectural taste. It is not only a reflection of contemporary Indian architecture but also source of reference material for architecture historians. Moreover it fulfills the needs of architects and other professionals engaged in house construction activity along with those general readers who wish to keep themselves informed of what is happening in the field of creative design. *Associations' Publications in Print*, 1981. 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations **Art and Architecture**

**Book Guide**, 1974 **Under Every Roof** Patricia Brown Glenn, 2009-10-19 This book is a delightful guide to understanding and identifying architectural styles for kids and their parents. Why do houses look the way they do? Why do some have small windows while others seem to be all glass? Why do some hug the landscape while others are tall with very steep roofs? Why do some people live in mansions while others live in mobile houses? Can you imagine a house that looks like an elephant or a shoe? Children and adults will learn about the history of domestic architecture, the styles of the houses we live in and the terms for the architectural elements that compose the buildings. Use the pictorial field guide to investigate your own house then take it along on family outings to identify different architectural details. Under Every Roof features more than 60 houses from 30 states and the District of Columbia that are listed in the National Register of Historic Places; many of these are house museums that are open to the public. Kids need to understand the house they live in so the book also includes a wide variety of regional styles and architectural types. The full color watercolor illustrations add a unique gentle humor to the text.

*Traditional Buildings* Allen Noble, 2009-09-18 Based on a lifelong professional and personal interest, *Traditional Buildings* presents a unique survey of vernacular architecture across the globe. The reader is taken on a fascinating tour of traditional building around the world which includes the loess cave homes of central China, the stilt houses on the shores of Dahomey, the house barns of Europe and North America, the wind towers of Iran, the Bohio houses of the Arawak Indians of the Caribbean and much more. Professor Noble's extensive travels have allowed him to examine many of the buildings at close quarters and the richly illustrated text includes photographs from his personal collection. With its comprehensive and detailed bibliography, the work will be welcomed by experts and non-specialists alike. **Realtors Review**, 1978 [Library Journal](#), 1997 [The Library Journal](#), 1997 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately
