and the changing nature of planning itself The questions covered include Why have we moved away from state housing provision How might the current crisis in housing affordability be addressed through planning policy Why has recent debate broadened to encompass the idea of sustainable communities How will we deliver quality affordable housing in the future What role should the planning system play in delivering decent homes in the years ahead This comprehensive narrative provides students planners and researchers with a valuable account of the evolving relationship between planning and housing to aid contextual understanding and suggest how current issues might evolve in the future

Housing in Taiwan William D.H. Li, 2019-01-15 Published in 1998 in this book the author points out the inadequacies caused by the division between housing research on production and consumption and the theoretical divide between structural and agent centred approaches on housing By developing an understanding of social relations within the structured process of housing provision the author argues that action and the specific form of housing provision can be better understood By using pre sale housing in Taiwan as a positive example the author shows how housing production and consumption are closely related and structured through agents purposive interaction and how agents are benefited through their relations

Rent Control in North America and Four European Countries

William Smith, Michael Teitz, 2020-02-18 Rent control the governmental regulation of the level of payment and tenure rights for rental housing occupies a small but unique niche within the broad domain of public regulation of markets The price of housing cannot be regulated by establishing a single price for a given level of quality as other commodities such as electricity and sugar have been regulated at various times Rent regulation requires that a price level be established for each individual housing unit which in turn implies a level of complexity in structure and oversight that is unequaled Housing provides a sense of security defines our financial and emotional well being and influences our self definition Not surprisingly attempts to regulate its price arouse intense controversy Residential rent control is praised as a guarantor of affordable housing excoriated as an indefensible distortion of the market and both admired and feared as an attempt to transform the very meaning of housing access and ownership This book provides a thorough assessment of the evolution of rent regulation in North American cities Contributors sketch rent control s origins legal status economic impacts political dynamics and social meaning Case studies of rent regulation in specific North American cities from New York and Washington DC to Berkeley and Toronto are also presented This is an important primer for students advocates and practitioners of housing policy and provides essential insights on the intersection of government and markets
