- Consider relative log earnings ($\ln \textit{earn}$) and log house prices ($\ln \textit{hp}$).
- $F_1(\ln \textit{earn}_r) = (1 - \lambda_1 \textit{conn}_r)(\ln \textit{earn}_r - \ln \textit{earn}_{GB}) + \lambda_1 \textit{conn}_r(\ln \textit{earn}_r - \textit{contig} \ln \textit{earn}_r)$
 $F_2(\ln \textit{hp}_r) = (1 - \lambda_2 \textit{conn}_r)(\ln \textit{hp}_r - \ln \textit{hp}_{GB}) + \lambda_2 \textit{conn}_r(\ln \textit{hp}_r - \textit{contig} \ln \textit{hp}_r)$
- \textit{conn}_r is a measure of connectivity (ratio of connected boundary to total boundary).
- We expect λ_2 to be positive and exceed λ_1 , which may be negative.

The Insecure Workforce Edmund Heery, Professor Edmund Heery, John Salmon, 2000-02-24 For the past two decades employment in Britain has been marked by a search for greater flexibility in the availability and use of labour In recent years however there has been mounting concern at the costs of this trend and an appreciation that the consequence of a flexible labour market may be an insecure workforce vulnerable to exploitation

United Kingdom International Monetary Fund. European Dept., 2018-02-13 This Selected Issues paper on the United Kingdom finds that the main factors behind the slowdown include weak productivity growth labor market slack and low inflation Recent labor market developments in the United Kingdom appear to point to disconnect between unemployment and wages Although the unemployment rate has fallen to a 40 year low wage growth continues to growth at a subdued pace The analysis in this paper suggests that this puzzle is explained by persistent weak productivity growth and well anchored inflation expectations as well as by greater effective labor market slack than suggested by the headline unemployment rate Broader measures of underemployment accounting for involuntary part time unemployment inactive and self employed people seeking regular jobs suggest that slack in the labor market was higher than implied by the unemployment rate in recent years Persistent tightness of the labor market should prompt some firming of wage growth in the coming year everything else equal A mild increase in unit labor costs would help bring domestically generated inflation in line with the inflation target

and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Darren P Smith Loughborough University UK Fielding's book on contemporary internal migration in Britain comprises a magisterial review of a complex topic It moves very logically from the description of the migration patterns through discussion of the key drivers onto policy oriented speculation about future developments in the light of alternative scenarios of economic social and environmental change The author has a refreshingly direct and authoritative style that puts his own personal stamp on the book making for a compelling but also thought provoking read Tony Champion Newcastle University UK
