From Man to Ape Adriana Novoa, Alex Levine, 2010-12-15 Upon its publication The Origin of Species was critically embraced in Europe and North America But how did Darwin s theories fare in other regions of the world Adriana Novoa and Alex Levine offer here a history and interpretation of the reception of Darwinism in Argentina illuminating the ways culture shapes scientific enterprise In order to explore how Argentina s particular interests ambitions political anxieties and prejudices shaped scientific research From Man to Ape focuses on Darwin s use of analogies Both analogy and metaphor are culturally situated and by studying scientific activity at Europe s geographical and cultural periphery Novoa and Levine show

that familiar analogies assume unfamiliar and sometimes startling guises in Argentina The transformation of these analogies in the Argentine context led science as well as the interaction between science popular culture and public policy in surprising directions In diverging from European models Argentine Darwinism reveals a great deal about both Darwinism and science in general Novel in its approach and its subject From Man to Ape reveals a new way of understanding Latin American science and its impact on the scientific communities of Europe and North America *Criminology Research Focus* Karen T. Froeling, 2007 Criminology is the scientific study of crime as an individual and social phenomenon Criminological research areas include the incidence and forms of crime as well as its causes and consequences They also include social and governmental regulations and reactions to crime Criminology is an interdisciplinary field in the behavioural sciences drawing especially on the research of sociologists and psychologists as well as on writings in law This book presents leading research from around the world The Hispanic American Historical Review ,1926
