Clausen, 2005 How a building and the reaction to it signaled the end of an era the transformation of architectural practice in the context of New York City culture and politics **Stained Glass**, 1995 **The Experimenters** Eva Díaz, 2014-12-25 In the years immediately following World War II Black Mountain College an unaccredited school in rural Appalachia became a vital hub of cultural innovation Practically every major artistic figure of the mid twentieth century spent some time there Merce Cunningham Ray Johnson Franz Kline Willem and Elaine de Kooning Robert Motherwell Robert Rauschenberg Dorothea Rockburne Aaron Siskind Cy Twombly the list goes on and on Yet scholars have tended to view these artists time at the College as little more than prologue a step on their way to greatness With *The Experimenters* Eva Díaz reveals the importance of Black Mountain College and especially of three key teachers Josef Albers John Cage and R Buckminster Fuller to be much greater than that Díaz's focus is on experimentation Albers Cage and Fuller she shows taught new models of art making that favored testing procedures rather than personal expression These methodologies represented incipient directions for postwar art practice elements of which would be sampled and often wholly adopted by Black Mountain students and subsequent practitioners The resulting works which interrelate art and life in a way that imbues these projects with crucial relevance not only reconfigured the relationships among chance order and design they helped redefine what artistic practice was and could be for future generations Offering a bold compelling new angle on some of the most widely studied creative figures of modern times *The Experimenters* does nothing less than rewrite the story of art in the mid twentieth century **Architectural Science and the Sun** Dason Whitsett, Matt Fajkus, 2018-04-17 *Architectural Science and the Sun* synthesizes physics climate program and perception to provide a foundation in the principles of architectural science related to the sun solar geometry solar analysis and design techniques passive design principles and daylighting Part analytical handbook part inspiration source for schematic design the content comprises a critical component of effective sustainable design Beyond the purely technical

aspects of these topics Architectural Science and the Sun begins with the premise that great architecture goes beyond energy performance and the visual aesthetic to engage all of the senses Given that the stimuli to which our senses respond are physical phenomena such as light heat and sound the designer must manipulate these parameters through the craft of building form and technology to create the desired qualitative experience This book is designed to help the reader develop that skill

Chromatic Modernity Sarah Street, Joshua Yumibe, 2019-04-02 The era of silent film long seen as black and white has been revealed in recent scholarship as bursting with color Yet the 1920s remain thought of as a transitional decade between early cinema and the rise of Technicolor despite the fact that new color technologies used in film advertising fashion and industry reshaped cinema and consumer culture In Chromatic Modernity Sarah Street and Joshua Yumibe provide a revelatory history of how the use of color in film during the 1920s played a key role in creating a chromatically vibrant culture Focusing on the final decade of silent film Street and Yumibe portray the 1920s as a pivotal and profoundly chromatic period of cosmopolitan exchange collaboration and experimentation in and around cinema Chromatic Modernity explores contemporary debates over color's artistic scientific philosophical and educational significance It examines a wide range of European and American films including Opus 1 1921 L'Inhumaine 1923 Die Nibelungen 1924 The Phantom of the Opera 1925 The Lodger 1927 Napoléon 1927 and Dracula 1932 A comprehensive comparative study that situates film among developments in art color science and industry Chromatic Modernity reveals the role of color cinema in forging new ways of looking at and experiencing the modern world

**Bauhaus Effects in Art, Architecture, and Design** Kathleen James-Chakraborty, Sabine T. Kriebel, 2022-04-21 Bringing together an international team of scholars this book offers new perspectives on the impact that the Bauhaus and its teaching had on a wide range of artistic practices Three of the fields in which the Bauhaus generated immediately transformative effects were housing typography and photography Contributors go further to chart the surprising relation of the school to contemporary developments in hairstyling and shop window display in unprecedented detail New scholarship has detailed the degree to which Bauhaus faculty and students set

off around the world but it has seldom paid attention to its impact in communist East Germany or in countries like Ireland where no Bauhaus settled. This wide ranging collection makes clear that a century after its founding many new stories remain to be told about the influence of the twentieth century's most innovative arts institution. The book will be of interest to scholars working in art history, design history, photography and architectural history. *New York Magazine*, 1995-09-11

Blurred Transparencies in Contemporary Glass Architecture Aki Ishida, 2020-04-22

Blurred Transparencies in Contemporary Glass Architecture brings to light complex readings of transparent glass through close observations of six pivotal works of architecture. Written from the perspectives of a practitioner, the six essays challenge assumptions about fragility and visual transparency of glass. A material imbued with idealism and utopic vision, glass has captured architects' imagination and glass's fragility and difficulties in thermal control continue to present technical challenges. In recent decades, architecture has witnessed an emergence of technological advancements in chemical coating, structural engineering and fabrication methods that resulted in new kinds of glass transparencies. Buildings examined in the book include a sanatorium with expansive windows delivering light and air to recovering tuberculosis patients, a pavilion with a crystal clear glass plenum circulating air for heating and cooling, a glass monument symbolizing the screen of personal devices that shortened the distance between machines and humans, and a glass building symbolizing the social and material intertwining in the glass ceiling metaphor. Connecting material glass to broader cultural and social contexts, Blurred Transparencies in Contemporary Glass Architecture enlightens students and practitioners of architecture as well as the

general public with interest in design The author demonstrates how glass is rarely crystal clear but is blurred both materially and metaphysically revealing complex readings of ideas for which glass continues to stand **New York Magazine**, 1995-09-18 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea
