collection of essays on property and equality acknowledges this diversification by presenting research results in two complementary volumes They bring together a wide range of authoritative researchers most of whom have worked with hunter gatherer groups These two volumes cover existing ethnographic and theoretical ground while maintaining a clear focus on the relation between property and equality The book consists of the most recent work of prominent members of the original group of researchers in hunter gatherer studies among them James Woodburn and Richard Lee and very recent ethnography on hunter gatherers and other egalitarian systems

The Gates of Hell Andrew D. Lambert, 2014-05-14 From one of our foremost naval historians the compelling story of the doomed Arctic voyage of the HMS Erebus and the HMS Terror commanded by Captain Sir John Franklin Andrew Lambert a leading authority on naval history reexamines the life of Sir John Franklin and his final doomed Arctic voyage Franklin was a man of his time fascinated even obsessed with the need to explore the world he had already mapped nearly two thirds of the northern coastline of North America when he undertook his third Arctic voyage in 1845 at the age of fifty nine His two ships were fitted with the latest equipment steam engines enabled them to navigate the pack ice and he and his crew had a three year supply of preserved and tinned food and more than one thousand books Despite these preparations the voyage ended in catastrophe the ships became imprisoned in the ice and the men were wracked by disease and ultimately wiped out by hypothermia scurvy and cannibalism Franklin's mission was ostensibly to find the elusive North West Passage a viable sea route between Europe and Asia reputed to lie north of the American continent Lambert shows for the first time that there were other scientific goals for the voyage and that the disaster can only be understood by reconsidering the original objectives of the mission Franklin commonly dismissed as a bumbling fool emerges as a more important and impressive figure in fact a hero of navigational science

Visual Culture and Arctic Voyages Eavan O'Dochartaigh, 2022-03-10 In the mid nineteenth century thirty six expeditions set out for the Northwest Passage in search of Sir John Franklin's missing expedition The array of visual and textual material produced on these voyages was to have a profound impact on the idea of the Arctic in the Victorian imaginary Eavan O'Dochartaigh closely examines neglected archival sources to show how pictures created in the Arctic fed into a metropolitan view transmitted through engravings lithographs and panoramas Although the metropolitan Arctic revolved around a fulcrum of heroism terror and the sublime the visual culture of the ship reveals a more complicated narrative that included cross dressing theatricals dressmaking and dances with local communities O'Dochartaigh's investigation into the nature of the on board visual culture of the nineteenth century Arctic presents a compelling challenge to the man versus nature trope that still reverberates in polar imaginaries today This title is also available as Open Access on Cambridge Core

America, History and Life ,1993 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide *Caribou Herds of Northwest Alaska, 1850-2000* Ernest S. Burch Jr.,2012-09-15 In his final major publication Ernest S Tiger Burch Jr reconstructs the distribution of caribou herds in northwest Alaska using data and information from research conducted over the past several

decades as well as sources that predate western science by more than one hundred years. Additionally, he explores human and natural factors that contributed to the demise and recovery of caribou and reindeer populations during this time. Burch provides an exhaustive list of published and unpublished literature and interviews that will intrigue laymen and experts alike. The unflinching assessment of the roles that humans and wolves played in the dynamics of caribou and reindeer herds will undoubtedly strike a nerve. Supplemental essays before and after the unfinished work add context about the author, the project of the book, and the importance of both.

Arctic Hell-Ship William Barr, 2007-06. In 1850, Richard Collinson captained the HMS Enterprise on a voyage to the Arctic via the Bering Strait in search of the missing Franklin expedition. Arctic Hell Ship describes the daily progress of this little-known Arctic expedition and examines the steadily worsening relations between Collinson and his officers. William Barr has based his research on a wide range of original archival documents, and the book is illustrated with a selection of vivid paintings by the ship's assistant surgeon, Edward Adams.

When Worlds Collide T. Max Friesen, 2013-05-16. Interactions between societies are among the most powerful forces in human history. However, because they are difficult to reconstruct from archaeological data, they have often been overlooked and understudied by archaeologists. This is particularly true for hunter-gatherer societies, which are frequently seen as adapting to local conditions rather than developing in the context of large-scale networks. When Worlds Collide presents a new model for discerning interaction networks based on the archaeological record and then applies the model to long-term change in an Arctic society. Max Friesen has adapted and expanded world system theory in order to develop a model that explains how hunter-gatherer interaction networks or world systems are structured and why they change. He has utilized this model to better understand the development of Inuvialuit society in the western Canadian Arctic over a 500-year span from the pre-contact period to the early twentieth century. As Friesen combines local archaeological data with more extensive ethnographic and archaeological evidence from the surrounding region, a picture emerges of a dynamic Inuvialuit world system characterized by bounded territories, trade, warfare, and other forms of interaction. This world system gradually intensified as the impacts of Euroamerican colonial activities increased. This intensification, Friesen suggests, was based on pre-existing Inuvialuit social and economic structures rather than on patterns imposed from outside. Ultimately, this intense interacting network collapsed near the end of the nineteenth century. When Worlds Collide offers a new way to comprehend small-scale world systems from the point of view of indigenous people. Its approach will prove valuable for understanding hunter-gatherer societies around the globe.
