Newswriters Unite Catherine McKercher,2002 Over the

last forty years new technology and rapid concentration of ownership have caused fundamental changes in North American newspapers. Newswriters unions have struggled to protect their members and to reinvent themselves to keep up with the relentless pace of change in the workplace and recent strikes such as that of Seattle newspaper workers highlight the ongoing challenges. This engaging and accessible book focuses on how the Newspaper Guild, the main union for reporters and editors, adopted a strategy of labor convergence, joining with other media workers in the large and diverse Communications Workers of America union. McKercher also looks at the nationalism of Canadian newswriters who instead joined an all Canadian union similar to CWA and explores a case study on an extreme form of labor convergence in Vancouver. She concludes that while labor convergence is a work in progress, it is a promising development for newswriters and their unions, helping them adjust to change and perhaps expand into new areas of the communication sector.

Journalism for the 21st Century Tom Koch, 1991-07-30 This is a book about the news, the way it is written and the forms it takes. It examines the relation between the content of public information and the potential effect of new technologies on the degree and type of information available in the public forum. Tom Koch uses concrete casebook examples to demonstrate the degree to which news information can be changed through the efficient and cost effective application of online bibliographic resources accessed by personal computers. Koch argues that new computer based technologies will revolutionize news and public information by fundamentally altering the relation between writer and news subject. He shows how electronic databases, by making enormous amounts of data on virtually every subject available to the news writer or editor, have changed the equation which has defined news since at least the 1920s. To make clear the degree to which these systems will transform news, the author demonstrates how online resources can be used efficiently and inexpensively by generalists. Practical issues of online use are presented within the context of both the parameters of contemporary journalism and the means by which these technologies address its limits. Two separate chapters, one describing search technologies and the other reviewing database organization, will be of practical value to both neophyte and journeyman news and public information writers alike. Using examples from his own and other's work, Koch demonstrates ways to carry out simple and inexpensive searches. His book will be especially important to the news or research librarian, reporter, and the public information or public relations writer.

The Electronic Grapevine Diane L. Borden, Kerric Harvey, 2013-11-05 The widespread use of the Internet as a tool for gathering and disseminating information raises serious questions for journalists and their readers about the process of reporting information. Using virtual sources and publishing online is changing the way in which journalism takes place and its effect on the society it serves.

USE LAST THREE PARAGRAPHS ONLY FOR GENERAL CATALOGS

The Electronic Grapevine explores the use of online media by reporters in the United States and examines the impact that usage may have on how journalism is framed in the cultural sphere as well as how it is conducted in the professional one. It contains a mix of material examining how it feels to do online journalism, how it affects those who consume it, different ways that media scholars go

about trying to understand it better and the likely social and cultural impact of Internet like technologies on the public at whom all this electronic information is eventually aimed Drawing from the emerging scholarly work in the field and from the real life experiences of working journalists Borden and Harvey collect contributions that examine why journalists use the Internet what changes it makes in how they approach their jobs and what differences they see in conducting their daily newsgathering with this medium rather than other methods The volume also analyses when and why journalists do not use online media and what the impact of the decision to use or not use the Internet may mean for the outer world whose perceptions of itself are so often shaped by journalistic portrait This series of thought provoking original essays explores the impact of computer based information and communication services on traditional journalistic routines and practices and thereby addresses a critical gap in the scholarly literature on communication law and culture Distinguishing between linkage devices like the Internet and database resources such as LEXIS NEXIS America Online and others this book examines the ways in which both types of online services may reshape and redefine not only the products of journalistic effort but the newsgathering process itself

Ethics and Electronic Information in the Twenty-first Century Lester J. Pourciau,1999 A compilation of the proceedings from a symposium of the same name as the book Topics include access to information Internet ethics and free speech the ethics of electronic information in China today privacy and the Internet copyright and regulation of information and Internet commerce

The New Media Theory Reader Hassan, Robert,Thomas, Julian,2006-09-01 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon

Head's Broadcasting in America Michael McGregor,2016-01-08 This book documents the dramatic changes in the field of electronic media in the past decade and provides informed insights in the exciting and changes yet to come It examines the transition in broadcasting from analog to digital transmission and the changing business models of electronic media

The Media and the Military P. Young,P. Jesser,1997-10-13 The first comprehensive study of the contentious issue of the public's right to know in time of war or limited conflict The book traces the uneasy relations between the military and a generally unprepared and gullible media from the Crimea to the present day It shows how the advent of nuclear warfare has outlawed the nationalistic wars of survival of the past and freed the citizen from his age old obligations in time of war able to make up his or her own mind on the merits of the situation It is here that the battle lies in the struggle for public opinion as a necessary precursor to war This book details how the military discovered the secret of media and public manipulation in the Falklands tested it in Grenada and refined it in Panama before deploying it in all its glory during the Gulf This book is essential reading for every soldier and journalist or any student of military history as it points the way to the future

Digital Transformation in Journalism and News Media Mike Friedrichsen,Yahya Kamalipour,2017-05-03 This book

analyzes various digital transformation processes in journalism and news media By investigating how these processes stimulate innovation the authors identify new business and communication models as well as digital strategies for a new environment of global information flows The book will help journalists and practitioners working in news media to identify best practices and discover new types of information flows in a rapidly changing news media landscape *The Panoptic Sort* Oscar H. Gandy, 2021 The Panoptic Sort was published in 1993 Its focus was on privacy and surveillance But unlike the majority of publications addressing these topics in the United States at the time that were focused on the privacy concerns of individuals especially those related to threats associated with government surveillance that book sought to direct public toward the activities of commercial firms It was highly critical of the failure of scholars and political activists to pay sufficient attention to the threats to individual autonomy collective agency and the exercise of social responsibility The Panoptic Sort was intended to help us all to understand just what was at stake when the bureaucracies of government and commerce gathered processed and made use of an almost unlimited amount of personal and transaction generated information to manage social economic and political activities within society It argued that unlike Foucault's panoptic prison which involved continual all encompassing surveillance the panoptic systems being developed at that time were turning their attention toward the development of techniques for the identification and classification of disciplinary subjects into distinct groups in ways that would increase the efficiency with which the techniques of correct training could be applied to those group members While the first edition provided numerous examples from marketing employment insurance credit management and the provision of government and social services the second edition extends descriptions of the technologies that have been developed and incorporated into the panoptic sort in the nearly 30 years since its initial publication In addition it places these technological advances and systemic expansions into the context of quite significant transformations in the nature of capitalism In addition to the massive expansion in the amount of data and information being gathered processed and distributed for use by corporations government agencies and newly developing public private partnerships advances in artificial intelligence and machine learning have placed the development of autonomous devices into positions of power that had barely been imagined in the past Assessments of the implications for democracy that many associate with the possibility of an algorithmic Leviathan invite a reconsideration of Jacques Ellul's distressing predictions about the future that ended the first edition of The Panoptic Sort [Encyclopedia of Journalism](#) Christopher H.
