From New Towns To Green Politics Campaigning For Town And Country Planning 1946 199:

From New Towns to Green Politics Dennis Hardy, 2003-12-16 From the 1940s to the 1990s *From New Towns to Green Politics* charts the course of successive issues and campaigns from the reconstruction of Britain's war torn cities to the introduction of green belts and new towns to regional and community planning and so to the inner cities and most recently green politics

Fabricating Lureland Julia Winckler, 2021-12-06 Through the analysis of surviving archival traces this book constructs a history of the imagination and memory of the town of Peacehaven Built as a speculative development atop iconic chalk cliffs on the Sussex Coast and marketed as a garden city by the sea the estate quickly attracted adverse publicity Influential voices such as the Bloomsbury group's Virginia and Leonard Woolf architect and writer Clough Williams Ellis and the Campaign for the Protection of Rural England soon began to criticise it as a blot on the rolling pastoral downland Instead of reading and appraising Peacehaven's story in a polarized way this book breaks new ground by critically interpreting visual representations and commissioned photographs of the Estate and re evaluating propositions from its inception which aspired to secure improved public health and home ownership in direct response to the negative impact of industrialization and WWI Focusing on the interwar period and tracing mutating agendas the book investigates contested marketing and construction narratives through Histoire Crois e methodology and its intercrossings with memory and the imagination By combining visual and creative research methods with oral history multi layered narratives of place come into focus The study tracks the visual programme of the developer's in house magazine Peacehaven Post alongside previously underexplored blueprints photographs postcards and promotional guidebooks and considers the garden city narrative as a form of social Utopia Garden city ideals are once again evoked in debates as a potential solution to the ongoing national housing shortage giving this research additional urgency as new large scale redevelopment erases many of the few and fast disappearing original landmarks

Rural Politics Michael Winter, 2013-05-13 The rural areas of Britain Europe and the developed world are undergoing massive changes with increasing concern about productivity agricultural methods and environmental policy Rural Politics examines the issues affecting rural areas such as water pollution forestry and the greening of agricultural policy It looks in particular at the political parameters to these issues and how concern for the countryside is essentially a part of a wider set of political processes Rural Politics provides a much needed examination of the evolution and content of policies affecting today's countryside both in terms of major land uses and economic and social development

Geographies of Transport and Mobility

Stewart Barr,Jan Prillwitz,Tim Ryley,Gareth Shaw,2017-10-04 Geographies of Transport and Mobility aims to provide a comprehensive and evidenced account of the intellectual and pragmatic challenges for personal mobility in the twenty first century In doing so it argues that geographers have a key role to play in shaping academic and policy debates on how personal mobility can become more sustainable The book is structured in three parts Part I explores how personal mobility has evolved since the mid nineteenth century plotting the intricate relationship between new forms of mobile technology urban planning and design and social practices Part II examines how researchers study transport and mobility and outlines the different intellectual trajectories of transport geography and geographies of mobilities Part III then outlines and discusses the discourse of sustainable mobility that has emerged in recent years the ways in which social economic and environmental sustainability can be promoted through different strategies focusing on behavioural change and urban design Geographies of Transport and Mobility provides a unique perspective on personal mobility by demonstrating how the way we travel has developed through complex economic and social processes It argues that this historical context is critical for considering how mobility in the twenty first century can be more sustainable not just environmentally but also economically and socially As such it argues for a renewed focus on sustainable place making as a way to radically shift mobility practices Geographies of Transport and Mobility is designed to appeal to advanced level undergraduate students and researchers in the fields of geography anthropology psychology sociology and transport studies
