Transforming Summary Justice Jenni Ward, 2016-11-10 Sweeping changes are being introduced into the lower tier magistrates courts in England and Wales in efforts to modernise the system and speed up case processing They concentrate on delivering prompt justice within a modern efficient and technologically advanced system But these transformations are fundamentally changing the way justice is delivered This book analyses criminal court streamlining processes and argues that there are areas where due process protections are being undermined Transforming Summary Justice reports empirical research carried out with lay magistrates and criminal justice professionals Views and experiences drawn from magistrates are valuable because of the central role they perform in lower court justice Further magistrates provide a wider understanding of the context in which the lower criminal courts operate and enable a critical appraisal of this unique style of lay justice This book is directed at students of criminology criminal justice and socio legal studies who will find the debates stimulating and useful to engage with in contemporary analyses of criminal court justice It will also be of interest to justice and legal professionals who are seeing swingeing alterations to the field in which they work The book will have appeal in other common law jurisdictions where similar modifications to lower court justice are occurring and also across Europe where lay involvement in legal decision making is being debated and becoming accepted practice *The Routledge*

The Ethics of Plea Bargaining
Richard L. Lippke, 2011 The practice of plea bargaining plays a hugely significant role in the adjudication of criminal charges and has provoked intense debate about its legitimacy This book offers the first full length philosophical analysis of the ethics of plea bargaining It develops a sustained argument for restrained forms of the practice and against the free wheeling versions that predominate in the United States In countries that have endorsed plea bargains such as the United States upwards of ninety percent of criminal defendants plead guilty rather than go to trial Yet trials which grant a presumption of innocence to defendants and place a substantial burden of proof on the state to establish guilt are widely regarded as the most appropriate mechanisms for fairly and accurately assigning criminal sanctions How is it that many countries have abandoned the formal rules and rigorous standards of public trials in favor of informal and veiled negotiations between state officials and criminal defendants concerning the punishment to which the latter will be subjected More importantly how persuasive are the myriad justifications that have been provided for plea bargaining These are the questions addressed in this book Examining the legal processes by which individuals are moved through the criminal justice system the fairness of those processes and the ways in which they reproduce social inequality this book offers an ethical argument for restrained forms of plea bargaining It also provides a comparison between the different plea bargaining regimes that exist within the US where it is well established England and Wales where the practice is coming under considerable critique and the European Union where debate continues on whether it coheres with inquisitorial legal regimes It suggests that rewards for admitting guilt are distinguished from penalties for exercising the right to trial and argues for modest fixed sentence reductions for defendants who admit their guilt These suggestions for reform include discouraging the current practice of deliberate over charging by prosecutors and charge bargaining and require judges to scrutinize more closely the evidence against those accused of crimes before any guilty pleas are entered by them Arguing that the negotiation of charges and sentences should remain the exception not the rule it nevertheless puts forward a normative defense for the reform and retention of the plea bargaining system

The Legacy of H.L.A. Hart Matthew H. Kramer, 2008 This book is the product of a major British Academy Symposium held in 2007 to mark the centenary of the birth of H L A Hart the most important legal philosopher and one of the most important political philosophers of the twentieth century The book brings together contributions from eighteen of the world s foremost legal and political philosophers who explore the many subjects in which Hart produced influential work Each essay engages in an original analysis of philosophical problems that were tackled by Hart some essays including extended critical discussions of his major works The Concept of Law Punishment and Responsibility Causation in the Law and Law Liberty and Morality All the main topics of Hart s philosophical writings are featured general jurisprudence and legal positivism criminal responsibility and punishment theories of rights toleration and liberty theories of justice and

causation in the law **Theorizing Legal Punishment** Richard L. Lippke, 2024-02-06 This book systematically defends an account of the institution of legal punishment that draws on both retributive and crime prevention thinking The work argues that legal punishment censures convicted offenders and thus morally communicates with them any victims and the broader community while also serving to reduce future crime The expressive or retributive element is assigned the lead role in this mixed account because it better captures the notion that members of society are to be held morally accountable for their failures to abide by defensible criminal prohibitions of various kinds Despite this it is conceded that the reduction of crime plays a vital role in justifying the institution of legal punishment and the book contains extended discussion of how and why this is so Beyond its explication of the aims of legal punishment and their respective roles within a mixed theory the study devotes separate chapters to sentencing criminal procedure and the imposition of fees and collateral legal consequences on individuals who have been convicted of crimes and fully served their sentences In these ways the work moves beyond discussion of the abstract aims of legal punishment to details of the institution's internal structure and operations The many historical deficiencies and failures of the institution are duly noted and the challenges they pose for punishment theorizing are examined The book closes with discussion of the limited success of punishment institutions in apprehending convicting and punishing those who violate the law including many who do so in serious ways Alternatives to reliance on legal punishment institutions are briefly examined In the end retention of such institutions is urged although it is suggested that we ought to have modest expectations about their ultimate success The work will be of interest to those working in the areas of Legal Philosophy and Criminology *Money and the Governance of Punishment* Patricia Cabana, 2017-06-26 Money is the most frequently means used in the legal system to punish and regulate Monetary penalties outnumber all other sanctions delivered by criminal justice in many jurisdictions imprisonment included More people pay fines than go to prison and in some jurisdictions many of those in prison are there because of failure to pay their fines Therefore it is surprising how little has been written in the Anglophone academic world about the nature of money sanctions and their specific characteristics as legal sanctions In many ways legal innovations related to money sanctions have been poorly understood This book argues that they are a direct consequence of the changing meaning of money Considering the meaninglessness of modern money the book aims to examine the history of changing conceptions in how fines have been conceived and used Using a set of interpretative techniques sensitive to how money and freedom are perceived the genealogy of the penal fine is presented as a story of constant reformulation in response to shifting political pressures and changes in intellectual developments that influenced ideological commitments of legislators and practitioners This book is multi disciplinary and will appeal to those engaged with criminology sociology and philosophy of punishment socio legal studies and criminal law *The Canada Income Tax Act: Enforcement, Collection, Prosecution - 2021 Edition (slightly updated) ... Political Theory is the first book to offer a comprehensive and critical survey of republican political theory Critically assesses its historical credentials conceptual coherence and normative proposals Brings together original contributions from leading international scholars in an interactive way Provides the reader with valuable insight into new debates taking place in republican political theory

Women and Punishment Pat Carlen, 2013-05-13 In the last decade there has been growing international concern about the increasing numbers of women in prison the effects that imprisonment has on their children the realisation that gaoled women have different criminal profiles and rehabilitative needs to male prisoners and the seeming intractability of the associated problems In response there has been an overarching policy concern in many countries to fashion and co ordinate gender specific policies towards female offenders which aim both to slow down the rate of their offending and or imprisonment and also to engender flexible programmes which will reduce the time spent in custody and or away from their young children The major objective of this book is to describe and analyse contemporary opportunities for and barriers to both the reduction of female prison populations and the reduction of the pain of those women who continue to be imprisoned It assesses the most important recent attempts to reduce both women s imprisonment and the damage it does identifying and analyzing cross jurisdiction and gender specific lessons to be learned and the unexpected consequences of some of the reform strategies This book brings together leading scholars and practitioners in the field providing a critique of the reform initiatives which have taken place and a much needed theorization of cross national policy in this area It will be essential reading for all with an interest in prisons and prison reform

Confronting Penal Excess David Hayes, 2019-11-14 This monograph considers the correlation between the relative success of retributive penal policies in English speaking liberal democracies since the 1970s and the practical evidence of increasingly excessive reliance on the penal State in those jurisdictions It sets out three key arguments First that increasingly excessive conditions in England and Wales over the last three decades represent a failure of retributive theory Second that the penal minimalist cause cannot do

without retributive proportionality at least in comparison to the limiting principles espoused by rehabilitation restorative justice and penal abolitionism Third that another retributivism is therefore necessary if we are to confront penal excess The monograph offers a sketch of this new approach late retributivism as both a theory of punishment and of minimalist political action within a democratic society Centrally criminal punishment is approached as both a political act and a policy choice Consequently penal theorists must take account of contemporary political contexts in designing and advocating for their theories Although this inquiry focuses primarily on England and Wales its models of retributivism and of academic contribution to democratic penal policy making are relevant to other jurisdictions too

Homeward Bruce Western, 2018-05-04 In the era of mass incarceration over 600 000 people are released from federal or state prison each year with many returning to chaotic living environments rife with violence In these circumstances how do former prisoners navigate reentering society In *Homeward* sociologist Bruce Western examines the tumultuous first year after release from prison Drawing from in depth interviews with over one hundred individuals he describes the lives of the formerly incarcerated and demonstrates how poverty racial inequality and failures of social support trap many in a cycle of vulnerability despite their efforts to rejoin society Western and his research team conducted comprehensive interviews with men and women released from the Massachusetts state prison system who returned to neighborhoods around Boston Western finds that for most leaving prison is associated with acute material hardship In the first year after prison most respondents could not afford their own housing and relied on family support and government programs with half living in deep poverty Many struggled with chronic pain mental illnesses or addiction the most important predictor of recidivism Most respondents were also unemployed Some older white men found union jobs in the construction industry through their social networks but many others particularly those who were black or Latino were unable to obtain full time work due to few social connections to good jobs discrimination and lack of credentials Violence was common in their lives and often preceded their incarceration In contrast to the stereotype of tough criminals preying upon helpless citizens Western shows that many former prisoners were themselves subject to lifetimes of violence and abuse and encountered more violence after leaving prison blurring the line between victims and perpetrators Western concludes that boosting the social integration of former prisoners is key to both ameliorating deep disadvantage and strengthening public

safety He advocates policies that increase assistance to those in their first year after prison including guaranteed housing and health care drug treatment and transitional employment By foregrounding the stories of people struggling against the odds to exit the criminal justice system Homeward shows how overhauling the process of prisoner reentry and rethinking the foundations of justice policy could address the harms of mass incarceration
