Returning editor Jay M. Stein chose the articles about half of them new to this edition based on suggestions from colleagues and students who used the first edition. Recommendations from planning scholars' awards for writing in the field of planning and his own review of recent planning literature. **Classic Readings in Urban Planning** offers an unparalleled depth of coverage and range of perspectives on traditional aspects of planning as well as on important contemporary issues. This is an exceptional main or supplementary textbook for advanced undergraduate or beginning graduate level students in urban and regional planning. An abstract introduces each reading, and each section includes suggestions for additional readings suitable for more extensive study.
