Covington, 1998 This book introduces the basic principles of motivation as they apply to classroom learning and management in a readable non technical form Covington argues against the popular notion that the problems existing in schools today stem primarily from a lack of student motivation Instead he asserts that students are motivated sometimes even overly motivated but often for the wrong reasons Traditional teaching methods including conventional grading procedures and an emphasis on competition can contribute to student demoralization and Covington identifies the ways in which students respond to misguided incentives For some students motivation is directed at avoiding failure by avoiding participation For others demoralization leads to withdrawal from an educational system that they believe to be irrelevant to their lives Still other

students are driven to prove their worth by outperforming fellow students The book suggests practical concrete ways that teachers can use classroom incentives to inspire a desire to learn *Traditional Forest-Related Knowledge* John A. EU Gráinne de Búrca,Joanne Scott,2000-04-01 This collection of essays addresses the changing constitutional framework of
the EU and some of the changing patterns of governance within this complex polity It examines the apparent and gradual
shift in the paradigm of European governance from one emphasising uniformity and harmonisation to one which embraces
flexibility and differentiation The chapters range from broad theoretical reflections on the constitutional implications of
flexibility for the European polity to focused case studies which examine various forms of variable geometry existing in
specific policy areas Some of the contributions challenge the extent to which there has actually been any significant change
of paradigm and others explore the many different meanings and instances of flexibility which have emerged Overall the
collection brings into focus both the problems and the potential ways forward for Europe which these constitutional
developments suggest
