driverless cars Through this perspective and a close examination of its relation to linguistics and psychology Azzouni freshly approaches longstanding epistemological puzzles including the dogmatism paradox Gettier puzzles Agrippa's trilemma and the surprise exam paradox Challenging Knowledge Jody Azzouni, 2025 Starting point epistemology SPE is a new position in epistemology that coupled with agent centered rationality the idea that a rational agent is one who cleaves to their own picture of rationality is the key to resolving philosophical scepticism SPE acknowledges that metacognitively sophisticated agents know that they know things and know some things about the methods by which this happens Agent centered rationality implies that a metacognitively sophisticated agent should only desert a knowledge claim because of a challenge they recognize to be fatal to that claim Scepticism is metacognitive pathology Except in those rare cases when an individual is cognitively damaged sceptical arguments should fail In Challenging Knowledge Jody Azzouni studies the various ways the cognitively healthy can protect themselves from prematurely denying what they take themselves to know A sceptical position results from an agent's failure to correctly monitor their own processes of knowledge gathering These scenarios are characterized as cases that are logically compatible with the evidence had by that agent but logical possibility is not coextensive with epistemic possibility The former allows cases that no agent should regard as challenging their knowledge claims and excludes cases that every agent should be concerned with Giving in to logically possible scenarios illustrates an agent's failure to stand their ground when inappropriately challenged e.g. yielding their knowledge claims in cases where they know the scenarios being presented are too remote to take seriously Azzouni shows how the arguments for Cartesian and Pyrrhonian scepticism turn on failures to appropriately evaluate one's knowledge gathering methods **A Pivotal Moment** Laurie Ann Mazur, 2012-09-26 With contributions by leading demographers environmentalists and reproductive health advocates *A Pivotal Moment* offers a new perspective on the complex connection between population dynamics and environmental quality It presents the latest research on the relationship between population growth and climate change ecosystem health and other environmental issues It surveys the new demographic landscape in which population growth rates have fallen but human numbers continue to increase It looks back at the lessons of the last half century while looking forward to population policies that are sustainable and just *A Pivotal Moment* embraces the concept of population justice which holds that inequality is a root cause of both rapid population growth and environmental degradation By addressing inequality both gender and economic we can reduce growth rates and build a sustainable future *Extreme Dreams Depend on Teams* Pat Williams, 2009-07-22 Pat says though the vision of one person can change the world no one can carry out a vision alone Extreme dreams depend on teams and lack of teamwork is often how big dreams go unrealized Using examples and anecdotes from history and contemporary life Pat shows how the greatest world changing events came to be as the result of the passion of single individuals In each case a team was assembled with people equipped in the various areas needed to bring the vision to pass Pat addresses team assembly dynamics and pitfalls to give readers guidance they can immediately

apply to their own circumstances Everyone is looking for ways to be more successful in life Pat Williams serves up a book packed with practical help to get readers where they want to be **McNaught's Monthly** Virgil V. McNitt,1925 **Going to Extremes** Nick Middleton,2012-08-09 In *Going to Extremes* writer presenter and Oxford geography don Nick Middleton visits Oymyakon in Siberia where the average winter temperature is 47 degrees and 40% of the population have lost their fingers to frostbite while changing the car wheel Next he travels to Arica Chile where there have been fourteen consecutive years without a drop of rain and so fog is people s only source of water Going from the driest to the wettest he visits Mawsynram in India which annually competes for the title with its neighbour Cherrapunji However Nick discovers even here that during the dry season there is water shortage and one entrepreneur has started selling it bottled Finally his journey takes him to Dalol in Ethiopia known as the hell hole of creation where the temperature remains at 94 degrees year round Here Nick will join miners who work all day with no shade limited water and no protective clothing The book and series consider how and why people lives in these harsh environments How does Nick s body react to these contrasting extremes He looks at the geographical and meteorological conditions He meets local characters and discovers the history of these settlements to find out how they ever became populated He looks at the way both the population and the flora and fauna have adapted physically to the climate and also considers the psychological impact of living under such conditions **Why Groups Go to Extremes** Cass R. Sunstein,2008 How does group behavior drive extremism and challenge democratic values Cass R Sunstein argues that the key to preventing the spread of extremist views is not to suppress deliberation among the like minded such groups productively challenge conventional thinking and majority opinion Instead policymakers should develop institutions to ensure that like minded groups encounter a diversity of opinions within civil society The goal Sunstein contends must be to create opportunities for civil deliberation that expose like minded group members to opposing views while exposing society at large to the views of such groups **The Novels and Other Works of Lyof N.
