**California** Kevin Starr,2007-03-13 A California classic California it should be remembered was very much the wild west having to wait until 1850 before it could force its way into statehood so what tamed it Mr Starr s answer is a combination of great men great ideas and great projects The Economist From the age of exploration to the age of Arnold the Golden State s premier historian distills the entire sweep of California s history into one splendid volume Kevin Starr covers it all Spain s conquest of the native peoples of California in the early sixteenth century and the chain of missions that helped that country exert control over the upper part of the territory the discovery of gold in January 1848 the incredible wealth of the Big Four railroad tycoons the devastating San Francisco earthquake of 1906 the emergence of Hollywood as the world s entertainment capital and of Silicon Valley as the center of high tech research and development the role of labor both organized and migrant in key industries from agriculture to aerospace In a rapid fire epic of discovery innovation catastrophe and triumph Starr gathers together everything that is most important most fascinating and most revealing about our greatest state Praise
