Our Stories John Martin Fischer, 2009-05-06 In this collection of essays on the metaphysical issues pertaining to death the meaning of life and freedom of the will John Martin Fischer argues against the Epicureans that death can be a bad thing for the individual who dies He defends the claim that something can be a bad thing a misfortune for an individual even if he never experiences it as bad and even if he does not any longer exist Fischer also defends the commonsense asymmetry in our attitudes toward death and prenatal nonexistence we are indifferent to the time before we are born but we regret that we do not live longer Further Fischer argues against the immortality curmudgeons such as Heidegger and Bernard Williams that immortal life could be desirable and shows how the defense of the possible badness of death and the possible goodness of immortality exhibit a similar structure on Fischer's view the badness of death and the goodness of life can be represented on spectra that display certain continuities Building on Fischer's previous book *My Way* a major aim of this volume is to show important connections between issues relating to life and death and issues relating to free will More specifically Fischer argues that we endow our lives with a certain distinctive kind of meaning an irreducible narrative dimension of value by exhibiting free will Thus in acting freely we transform our lives so that our stories matter **The Employee Experience**
