

A simple life is good with me.
I don't need a whole lot.
For me, a T-shirt,
a pair of shorts,
barefoot on a beach and

I'm happy.

Good And Simple Life:

Who Are We? William Sowder, Dr. Juanita Christopher, 2017-12-27 In this book among other sources we have compiled key thoughts and material that were dictated to Alice Bailey starting in the 1920s and continuing through the 1960s from the Tibetan master Djwhal Khul As you see in the references she wrote eighteen books which were published by Lucis Publishing Company New York Djwhal Khul shared this material from another dimension giving us a new perspective We highly recommend these books because Djwhal Khul is in a higher vibrational dimension working and aiding us in an enlightened evolution What we have added to this book is some of our thoughts about the energies to which Khul refers We know very little about these energies and this material presents a challenge to us in our evolutionary sojourn Each of us must pursue our understanding and knowledge about these energies This is our goal and our reason for writing this book Good travels to you

Travelling Ideas in the Long Nineteenth Century Petra Broomans, Janke Klok, 2019-11-19 Travelling Ideas in the Long Nineteenth Century is about how ideas travel on the waves of cultural transfer The volume focuses in particular on the exchange of ideas knowledge and culture between the Nordic countries and continental Europe It includes reflections on travelling and transmitting ideas through various forms and takes a step further in scrutinising how new theories in literary cultural and historical studies as well as new methods are influencing research in the field of cultural transfer and transmission In the first part of the volume the authors examine the export and import of ideas through literature in translation travel letters international education strategies and the establishment of artists colonies Attention is paid to how writers artists and cultural transmitters used their cross border mobility in transferring ideas and how they were connected to each other in new contact zones The second part is dedicated to new research approaches such as the use of digital instruments and research on the strategies and politics behind translated literature Here translation bibliographies and the bibliographical data of national libraries which today are often accessible in digital form come under scrutiny These sources are valuable objects of study in the mining of translation flows **147520776x**, **Russomania** Rebecca

Beasley, 2020-03-31 Russomania Russian Culture and the Creation of British Modernism provides a new account of modernist literature's emergence in Britain British writers played a central role in the dissemination of Russian literature and culture during the early twentieth century and their writing was transformed by the encounter This study restores the thick history of that moment by analyzing networks of dissemination and reception to recover the role of neglected as well as canonical figures and institutions as well as individuals The dominant account of British modernism privileges a Francophile genealogy but the turn of the century debate about the future of British writing was a triangular debate a debate not only between French and English models but between French English and Russian models Francophile modernists associated Russian literature especially the Tolstoyan novel with an uncritical immersion in life at the expense of a mastery of style and while individual works might be admired Russian literature as a whole was represented as a dangerous model for British writing

This supposed danger was closely bound up with the politics of the period and this book investigates how Russian culture was deployed in the close relationships between writers editors and politicians who made up the early twentieth century intellectual class the British intelligentsia Russomania argues that the most significant impact of Russian culture is not to be found in stylistic borrowings between canonical authors but in the shaping of the major intellectual questions of the period the relation between language and action writer and audience and the work of art and lived experience The resulting account brings an occluded genealogy of early modernism to the fore with a different arrangement of protagonists different critical values and stronger lines of connection to the realist experiments of the Victorian past and the anti formalism and revived romanticism of the 1930s and 1940s future

"Too Good a Town" Edward G. Agran, 1998-01-01 For fifty years William Allen White first as a reporter and later as the long time editor of the Emporia Gazette wrote of his small town and its Mid American values By tailoring his writing to the emerging urban middle class of the early twentieth century he won his gospel of Emporia a nationwide audience and left a lasting impact on the way America defines itself Investigating White's life and his extensive writings Edward Gale Agran explores the dynamic thought of one of America's best read and most respected social commentators Agran shows clearly how White honed his style and transformed the myth of conquering the western frontier into what became the twentieth century ideal of community building Once a confidante of and advisor to Theodore Roosevelt White addressed and reflected in his work all the great social and political oscillations of his time urbanization and industrialism populism and progressivism isolationism internationalism Prohibition and New Deal reform Again and again he asked the question What's the matter about his times and townspeople then found the middle ground With great care and discernment Agran gathers the many strains of White's messages demonstrating one writer's pivotal contribution to our idea of what it means to be an American

"Painting Labour in Scotland and Europe, 1850-1900" John Morrison, 2017-07-05 Painting Labour in Scotland and Europe 1850 1900 explores hitherto unrecognized European variations in the phenomena of rural labour imagery particularly in Scotland In exploring these distinctions relative to Scotland and Europe it looks to develop a new understanding of the commonalities and idiosyncrasies of rural labour imagery which have often been treated as homogenous Lacking the detailed analysis that has been accorded other images writing about Scottish painting has often been appended to analyses of English or French imagery It has generally been understood as intellectually divorced from the sometimes brutal realities of evolving Scottish nineteenth century urbanism or simply ignored Painting Labour in Scotland and Europe 1850 1900 sets out systematically to discuss the Scottish rural painting in relation to its particular Scottish historical context both sociological and aesthetic and its English and European counterparts Alongside canonical Scottish images by major figures such as James Guthrie the book explores many hitherto under researched and unconsidered paintings by nineteenth century Scottish artists and considers them in relation to major English and Continental Realist and Romantic painters The juxtaposition of J F Millet with W D McKay and Edwin Landseer

with George Reid makes for a volume that will appeal both to an academic audience and to one interested in European art history more generally
