Good Education The Virtues Of Learning:

Good Education Ivor Pritchard,1998 Advances an approach to moral education formed around the development of four moral virtues *Intellectual Virtues and Education* Jason Baehr,2015-12-22 With its focus on intellectual virtues and their role in the acquisition and transmission of knowledge and related epistemic goods virtue epistemology provides a rich set of tools for educational theory and practice In particular characteristics under the rubric of responsibilist virtue epistemology like curiosity open mindedness attentiveness intellectual courage and intellectual tenacity can help educators and students define and attain certain worthy but nebulous educational goals like a love of learning lifelong learning and critical thinking This volume is devoted to exploring the intersection between virtue epistemology and education It assembles leading virtue epistemologists and philosophers of education to address such questions as Which virtues are most essential to education How exactly should these virtues be understood How is the goal of intellectual character growth related to other educational goals for example to critical thinking and knowledge acquisition What are the best practices for achieving this goal Can growth in intellectual virtues be measured The chapters are a prime example of applied epistemology and promise to be a seminal contribution to an area of research that is rapidly gaining attention within epistemology and beyond [Resources in Education](#) ,2000-10 [Education and the Growth of Knowledge](#) Ben Kotzee,2013-10-10 Education and the Growth of Knowledge is a collection of original contributions from a group of eminent philosophers and philosophers of education who sketch the implications of advances in contemporary epistemology for education New papers on education and social and virtue epistemology contributed by a range of eminent philosophers and philosophers of education Reconceives epistemology in the light of notions from social and virtue epistemology Demonstrates that a reconsideration of epistemology in the light of ideas from social and virtue epistemology will in turn re invigorate the links between epistemology and education *Values Education and Lifelong Learning* David N. Aspin,Judith D. Chapman,2007-08-17 The aim of this book is to provide an easily accessible practical yet scholarly source of information about the international concern for the nature theory and practices of the ideas of values education and lifelong learning Each chapter in this book is written in an accessible style by an international expert in the field The book tackles the task of identifying analyzing and addressing the key problems topics and issues relevant to education and Lifelong Learning **Knowledge and Virtue in Teaching and Learning** Hugh Sockett,2012-03-29 The challenge this book addresses is to demonstrate how in teaching content knowledge the development of intellectual and moral dispositions as virtues is not merely a good idea or peripheral to that content but deeply embedded in the logic of searching for knowledge and truth It offers a powerful example of how philosophy of education can be brought to bear on real problems of educational research and practice pointing the reader to re envision what it means to educate children and how we might prepare teachers to take on such a role by developing the person instead of simply knowledge and skills Connected intimately to the practice of teaching and teacher education the book sets forth an alternative theory of

education where the developing person is at the center of education set in a moral space and a political order To this end a framework of public and personal knowledge forms the content to which personal dispositions are integral not peripheral The book s pedagogy is invitational welcoming its readers as companions in inquiry and thought about the moral aspects of what we teach as knowledge *Education with Character* James Arthur,2003-08-29 The establishment of citizenship education as a compulsory subject has recently been accompanied by the government s policy of promoting education with character Schools are identified as having a crucial role to play in helping to shape and reinforce basic character traits that will ultimately lead to a better society This radical new policy is explicitly linked to raising academic standards and to the needs of the emerging new economy This book provides an introduction to character education within the British context by exploring its meanings understandings and rationale through the perspective of a number of academic disciplines The author examines character education from a philosophical religious psychological political social and economic perspective to offer a more detailed understanding of character education and what it can offer He also considers how British schools can implement character education successfully and what lessons we can draw from the American experience This book will be of interest to academics researchers policy makers and teachers with responsibility for citizenship education in their schools

Learning, Leading, and the Best-Loved Self in Teaching and Teacher Education Cheryl J. Craig,Denise M. McDonald,Gayle A. Curtis,2022-12-10 This book explores the concept of the best loved self in teaching and teacher education asserting that the best loved self is foundational to the development of teacher identity growth in context and learning in community Drawing on the work of Joseph Schwab who was the first to name the best loved self the editors and their contributors extend this knowledge further through the collaboration of their group of teacher educators known as the Faculty Academy who have been involved in examining teacher education for over two decades Encyclopedia of Educational Theory and Philosophy D. C. Phillips,2014-06-06 The two volume Encyclopedia of Educational Theory and Philosophy introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice Drawing together a team of international scholars this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses Ubuntu Virtue Theory and Moral Character Formation Grivas Muchineripi Kayange,2023-12-01 This book investigates the ubuntu theory based conception of virtue and moral character formation in the northern western and eastern regions of Africa suggesting a critical reconstruction of ubuntu by conceptualising the four different forms of practices in moral character formation Arguing for the critical reconstruction of ubuntu virtue theory as more nuanced than simply the standard ubuntu normative virtue theories which give priority to the community as the sole locus for understanding virtues and character formation in Africa the book builds a comprehensive model of virtue and moral character formation that draws insights from the reconstructed notion of ubuntu

and other theories within and beyond the African thought Chapters feature experience from across Africa including Malawi Zambia Zimbabwe Uganda Kenya and South Africa and centre on topics such as traditional cultural views and practices political systems in various nations neoliberalist thought and primary secondary and tertiary education systems in Africa and further afield This is a valuable resource for scholars academics and postgraduate students working in the fields of moral and values education philosophy of education and the theory of education more broadly Those also interested in educational psychology may also find the volume of interest [Turbulence, Empowerment and Marginalisation in International Education Governance Systems](#) Alison Taysum, Khalid Arar, 2018-12-07 This book presents a new theory of empowerment exploring how senior leaders can navigate turbulence within governance systems to empower young societal innovators for equity renewal and peace
