qualitative assessment of the performance of medium armored forces in 13 past conflicts that span the range of military operations The accompanying analysis is designed to help inform U S Army decisions about fielding medium armored forces in the future The case histories yielded three major insights First medium armored forces fare poorly against competent heavily armored opponents This finding will prove relevant to the U S Army s medium armored forces if their survivability and lethality do not live up to expectations or cannot be fully realized in battlefield conditions Second doctrinal and organizational steps can in certain circumstances mitigate medium armor s liabilities These steps include the implementation of high quality combined arms tactics down to the lowest echelons the effective application of supporting firepower and training for crews and junior leaders Finally the U S Army has lacked a forced entry armor capability since the retirement of the M551 Sheridan Neither the Stryker vehicle nor the Future Combat Systems as currently envisioned can fill that critical void The authors conclude that it would be prudent for the U S Army to maintain a mix of heavy medium armored and light forces that can be task organized and employed in conditions that best match their attributes Medium armored forces have much to offer in such a mix provided by publisher
