Practice Meanings and Knowledge Transfer inspires more mindful and contemplative qualitative research on body and knowledge transfer in bodily practices in hatha yoga. The book explores the work of the mind as well as the role of emotions and body sensations in perceiving reality and in reflecting on it. Procedures and research methods are an extension of our mind which wants to reach into the social reality to describe it objectively. It usually refuses body and emotions. The techniques of sampling and representativeness are also tools of the mind. Using these tools our contact with social reality produces emotions and feelings of the body. These phenomena surrounding the mind and body often go unnoticed during research and are only partially reported in the conclusions. *Experiencing the Body in Yoga Practice Meanings and Knowledge Transfer* examines this gap. It presents the application of a contemplative way of thinking and proceeding in qualitative social research and a first person perspective focusing on experiencing lived body and knowledge transfer in hatha yoga. It analyzes how the mind focuses and stops working, proceeds in the finite province of the meaning of yoga, how the body produces emotions and deals with them during yoga sessions, and how the knowledge is transferred by using the body in some linguistic and cultural context. The book will be of interest to sociologists and social scientists who want to concentrate on and analyze the experiences of the body from contemplative and phenomenological perspectives. It is also key reading for all practitioners dealing with body and bodywork such as in sports, recreational activities, physical education, rehabilitation, physical work, educational activities etc.

New Yoga 4 New Age Jah Xolani Radebe, 2018-11-29. This book in a nutshell explains what yoga is and how it works, followed by an outline of its history and how it was developed in the East and adopted and adapted in the West. The book describes health and how it is measured, since a few medical books have their own definition of health, saturated and described in the Western context. It verifies how most people fail to define and measure their own state of health, since they only think that they are unhealthy when something is wrong, which has been influenced by what they have been socialised to think through the Western biomedical system. This book takes a moment to compare and contrast the Eastern definition opposed to the Western point of view. Furthermore, it defines health in terms of energy systems. Chapter four focuses on energy and recharging to maintain balance and free flowing quality and good volume for the state of health. Finally, the last two chapters discuss how yoga relates with other body energy systems and how yoga and energy therapies relate to everyday life. At the end of the book, there is a series of exercises which you can do to activate and cultivate your own energy and level of existence. If yoga is new to you, I hope that this book will inspire you to find spice in your life and begin to practice; if you are already a practitioner, I hope it will expand your frame of reference and take your works further.
