Information Design Robert Jacobson, 2000-08-25 The contributors to this book are both cautionary and hopeful as they offer visions of how information design can be practiced diligently and ethically for the benefit of information consumers as well as producers Information design is the newest of the design disciplines As a sign of our times when the crafting of messages and meaning is so central to our lives information design is not only important it is essential Contemporary information designers seek to edify more than to persuade to exchange more than to foist upon With ever more powerful technologies of communication we have learned that the issuer of designed information is as likely as the intended recipient to be changed by it for better or worse The contributors to this book are both cautionary and hopeful as they offer visions of how information design can be practiced diligently and ethically for the benefit of information consumers as well as producers They present various methods that seem to work such as sense making and way finding They make recommendations and serve as guides to a still young but extraordinarily pervasive and persuasive field Contributors Elizabeth Andersen Judy Anderson Simon Birrell Mike Cooley Brenda Dervin Jim Gasperini Yvonne M Hansen Steve Holtzman Robert E Horn Robert Jacobson John Krygier Sheryl Macy Romedi Passini Jef Raskin Chandler Screven Nathan Shedroff Hal Thwaites Roger Whitehouse

Sauer, 2003-01-30 The crash of an Amtrak train near Baltimore the collapse of the Hyatt hotel in Kansas City the incident at Three Mile Island and other large scale technological disasters have provided powerful examples of the ways that communication practices influence the events and decisions that precipitate a disaster These examples have raised ethical questions about the responsibility of writers within agencies epistemological questions about the nature of representation in science and rhetorical questions about the nature of expertise and experience as grounds for judgments about risk In *The Rhetoric of Risk* Technical Documentation in Hazardous Environments author Beverly Sauer examines how the dynamic uncertainty of the material environment affects communication in large regulatory industries Sauer's analysis focuses specifically on mine safety which provides a rich technical and historical context where problems of rhetorical agency narrative and the negotiation of meaning have visible and tragic outcomes But the questions

Sauer asks have larger implication for risk and safety How does writing function in large regulatory industries What can we learn from experience Why is this experience so difficult to capture in writing What information is lost when agencies rely on written documentation alone Given the uncertainties how can we work to improve communication in hazardous and uncertain environments By exploring how individuals make sense of the material technical and institutional indeterminacies of their work in speech and gesture The Rhetoric of Risk helps communicators rethink their frequently unquestioned assumptions about workplace discourse and the role of writers in hazardous worksites It is intended for scholars and students in technical writing and communication rhetoric risk analysis and risk communication as well as a wide range of engineering and technical fields concerned with risk safety and uncertainty
